Startup Your Life Anna Akbari,2016-12-27 A young entrepreneur and sociologist shows readers how to reach personal fulfillment using the same strategies that power Silicon Valley s greatest startups As an entrepreneur Anna Akbari learned that one of the best things about startups is their ability to pivot quickly basically a euphemism for failing and starting over And she quickly found that personal success is no different It s not just about developing and following the right process but also having a good idea And that demands rigor and daily maintenance far beyond a few positive affirmations Like any Silicon Valley startup the business of life is not as glamorous as its Instagram account would make it seem What do you do when planning is not an option When control is out of your reach You isolate the small stuff experiment constantly and use the results to lay a more sustainable foundation for the future You validate your idealized vision by testing it out in bite sized increments You see what sticks integrate and move forward And inevitably you experience a series of failures along the way but those failures are key to your next success Living a start up life is about maximizing flexibility and measuring on going results not avoiding failure or reaching one particular end goal It s about embracing defeat analyzing it and failing up In *Startup Your Life* Akbari shows that after all it s often the stumbles that pave the way for real happiness

My Groupon Adventure is an uproarious and uplifting chronicle showing that it's possible to escape even the deepest of ruts if you just inject a bit of spontaneity into your life.

Introduction to Information Systems R. Kelly Rainer, Casey G. Cegielski, Ingrid Spletstoeser-Hogeterp, Cristobal Sanchez-Rodriguez, 2013-08-30. The goal of *Introduction to Information Systems* 3rd Canadian Edition remains the same: to teach all business majors, especially undergraduate ones, how to use information technology to master their current or future jobs and to help ensure the success of their organization. To accomplish this goal, this text helps students to become informed users, that is, persons knowledgeable about information systems and information technology. The focus is not on merely learning the concepts of IT, but rather on applying those concepts to facilitate business processes. The authors concentrate on placing information systems in the context of business so that students will more readily grasp the concepts presented in the text. The theme of this book is "What's In IT for Me." This question is asked by all students who take this course. The book will show you that IT is the backbone of any business, whether a student is majoring in Accounting, Finance, Marketing, Human Resources, or Production Operations Management. Information for the Management Information Systems (MIS) major is also included.

Food in the Internet Age William Aspray, George Royer, Melissa G. Ocepek, 2013-09-06. This book examines food in the United States in the age of the Internet. One major theme running through the book is business opportunities and failures, as well as the harms to consumers and traditional brick-and-mortar companies that occurred as entrepreneurs tried to take advantage of the Internet to create online companies related to food. The other major theme is the concept of trust online and different models used by different companies to make their web presence seem trustworthy. The book describes a number of major food companies, including AllRecipes, Betty Crocker, Cook's Illustrated, Epicurious, Groupon, OpenTable, and Yelp. The book draws on business history, food studies, and information studies for its approach.
