Mirrors of Destruction Omer Bartov, 2000-08-24 *Mirrors of Destruction* examines the relationship between total war state organized genocide and the emergence of modern identity Here Omer Bartov demonstrates that in the twentieth century there have been intimate links between military conflict mass murder of civilian populations and the definition and categorization of groups and individuals These connections were most clearly manifested in the Holocaust as the Nazis attempted to exterminate European Jewry under cover of a brutal war and with the stated goal of creating a racially pure Aryan population and Germanic empire The Holocaust however can only be understood within the context of the century's predilection for applying massive and systematic methods of destruction to resolve conflicts over identity To provide the context for the Final Solution Bartov examines the changing relationships between Jews and non Jews in France and Germany from the outbreak of World War I to the present Rather than presenting a comprehensive history or a narrative from a single perspective Bartov views the past century through four interrelated prisms He begins with an analysis of the glorification of war and violence from its modern birth in the trenches of World War I to its horrifying culmination in the presentation of genocide by the SS as a glorious undertaking He then examines the pacifist reaction in interwar France to show how it contributed to a climate of collaboration with dictatorship and mass murder The book goes on to argue that much of the discourse on identity

throughout the century has had to do with identifying and eliminating society's elusive enemies or enemies from within. Bartov concludes with an investigation of modern apocalyptic visions showing how they have both encouraged mass destructions and opened a way for the reconstruction of individual and collective identities after a catastrophe. Written with verve, *Mirrors of Destruction* is rich in interpretations and theoretical tools and provides a new framework for understanding a central trait of modern history. *Le sacrifice d'un homme* Stéphane Carrion, 2005*, The National Union Catalog, Pre-1956 Imprints Library of Congress, American Library Association. Committee on Resources of American Libraries. National Union Catalog Subcommittee, 1969 The Yale Alumni Weekly, 1921 **The Nation**, 1894 Tuberculosis and War J. F. Murray, R. Loddenkemper, 2018-03-27 Tuberculosis TB remains the largest cause of adult deaths from any single infectious disease and ranks among the top 10 causes of death worldwide. When TB and war occur simultaneously, the inevitable consequences are disease, human misery, suffering, and heightened mortality. TB is therefore one of the most frequent and deadly diseases to complicate the special circumstances of warfare. Written by internationally acclaimed experts, this book provides a comprehensive analysis of the status of TB before, during, and after WWII in the 25 belligerent countries that were chiefly involved. It summarizes the history of TB up to the present day. A special chapter on Nazi Medicine: Tuberculosis and Genocide examines the horrendous inhuman Nazi ideology which during WWII used TB as a justification for murder and targeted the disease by eradicating millions who were afflicted by it. The final chapter summarizes the lessons learned from WWII and more recent wars and recommends anti-TB measures for future conflicts. This publication is not only of interest to TB specialists and pulmonologists but also to those interested in public health, infectious diseases, war-related issues, and the history of medicine. It should also appeal to nonmedical readers like journalists and politicians. **Harvard University Bulletin** Justin Winsor, 1889 **Baragirk' i gagghierên lezowê i hayerên** Biwzandats'i, 1882 **A History of Polish Christianity** Jerzy Kloczowski, 2000-09-14 This is a single volume history of Christianity in Poland, a subject at the core of religious history and European secular history alike. The book covers the development of Polish Christianity from the tenth century to the year 2000, placing it in the broader context of East Central European political, social, religious, and cultural history. Jewish-Christian relations and the problematic religious history of the Jews in the region play an important part in the story, and there are pervasive references to countries historically linked to Poland, such as Lithuania, Belarus, and Ukraine. Jerzy Kloczowski shows how the history of Poland and Polish Christianity are embedded in the complex systems of relations with other countries and religious denominations. A History of Polish Christianity should be read by anyone interested in the confrontation between Christianity and the totalitarian systems of the twentieth century and in the interplay between Eastern and Western Christianity.
