Knowledge Acquisition In Practice A Step By Step Guide Decision Engineering:

Knowledge Acquisition in Practice Nicholas Ross Milton, 2007-05-01 Recent years have seen an upsurge of interest in knowledge. Leading organisations now recognise the importance of identifying what they know, sharing what they know and using what they know for maximum benefit. Many organisations employ knowledge engineers to capture knowledge from experts using the principles and techniques of knowledge engineering. The emphasis is on a structured approach built on a sound understanding of the psychology of expertise and making use of knowledge modelling methods and the latest web technologies. *Knowledge Acquisition Projects* is the first book to provide a detailed step by step guide to the methods and practical aspects of acquiring, modelling, storing and sharing knowledge. The reader is led through 47 steps from the inception of a project to its successful conclusion. Each step is described in terms of the reasons for the step, the required resources, the activities to be undertaken and the solutions to common problems. In addition, each step has a checklist which lists the key items that should be achieved during the step. *Knowledge Acquisition Projects* will be of value to knowledge engineers, knowledge workers, knowledge officers and ontological engineers. The book will also be of interest to students and researchers of AI, computer science and business studies.

Approaches to Legal Ontologies Giovanni Sartor, Pompeu Casanovas, Mariangela Biasiotti, Meritxell Fernández-Barrera, 2010-12-25 The book provides the reader with a unique source regarding the current theoretical landscape in legal ontology engineering as well as on foreseeable future trends for the definition of conceptual structures to enhance the automatic processing and retrieval of legal information in the Semantic Web framework. It will thus interest researchers in the domains of the SW legal informatics, Artificial Intelligence and law, legal theory and legal philosophy as well as developers of e-government applications based on the intelligent management of legal or public information to provide both back office and front office support.

Multidisciplinary Design Optimization Supported by Knowledge Based Engineering Jaroslaw Sobieszczanski-Sobieski, Alan Morris, Michel van Tooren, 2017-05-08 *Multidisciplinary Design Optimization supported by Knowledge Based Engineering* supports engineers confronting this daunting and new design paradigm. It describes methodology for conducting a system design in a systematic and rigorous manner that supports human creativity to optimize the design objectives subject to constraints and uncertainties. The material presented builds on decades of experience in Multidisciplinary Design Optimization (MDO) methods progress in concurrent computing and Knowledge Based Engineering (KBE) tools. Key features: Comprehensively covers MDO and is the only book to directly link this with KBE methods. Provides a pathway through basic optimization methods to MDO methods. Directly links design optimization methods to the massively concurrent computing technology. Emphasizes real world engineering design practice in the application of optimization methods. *Multidisciplinary Design Optimization supported by Knowledge Based Engineering* is a one stop shop guide to the state of the art tools in the MDO and KBE disciplines for systems design engineers and managers. Graduate or post graduate students can use it to support their design courses and

researchers or developers of computer aided design methods will find it useful as a wide ranging reference

Knowledge-Based Integrated Aircraft Design Raghu Chaitanya Munjulury, 2017-05-23 The design and development of new aircraft are becoming increasingly expensive and timeconsuming To assist the design process in reducing the development cost time and late design changes the conceptual design needs enhancement using new tools and methods Integration of several disciplines in the conceptual design as one entity enables to keep the design process intact at every step and obtain a high understanding of the aircraft concepts at early stages This thesis presents a Knowledge Based Engineering KBE approach and integration of several disciplines in a holistic approach for use in aircraft conceptual design KBE allows the reuse of obtained aircrafts data information and knowledge to gain more awareness and a better understanding of the concept under consideration at early stages of design For this purpose Knowledge Based KB methodologies are investigated for enhanced geometrical representation and enable variable fidelity tools and Multidisciplinary Design Optimization MDO The geometry parameterization techniques are qualitative approaches that produce quantitative results in terms of both robustness and flexibility of the design parameterization The information parameters from all tools disciplines and the design intent of the generated concepts are saved and shared via a central database The integrated framework facilitates multi fidelity analysis combining low fidelity models with high fidelity models for a quick estimation enabling a rapid analysis and enhancing the time for a MDO process The geometry is further propagated to other disciplines Computational Fluid Dynamics CFD Finite Element Analysis FEA for analysis This is possible with an automated streamlined process for CFD FEM system simulation to analyze and increase knowledge early in the design process Several processes were studied to streamline the geometry for CFD Two working practices one for parametric geometry and another for KB geometry are presented for automatic mesh generation It is observed that analytical methods provide quicker weight estimation of the design and when coupled with KBE provide a better understanding Integration of 1 D and 3 D models offers the best of both models faster simulation and superior geometrical representation To validate both the framework and concepts generated from the tools they are implemented in academia in several courses at Linköping University and in industry

Legal Ontology Engineering Núria Casellas, 2011-08-12 Enabling information interoperability fostering legal knowledge usability and reuse enhancing legal information search in short formalizing the complexity of legal knowledge to enhance legal knowledge management are challenging tasks for which different solutions and lines of research have been proposed During the last decade research and applications based on the use of legal ontologies as a technique to represent legal knowledge has raised a very interesting debate about their capacity and limitations to represent conceptual structures in the legal domain Making conceptual legal knowledge explicit would support the development of a web of legal knowledge improve communication create trust and enable and support open data e government and e democracy activities Moreover this explicit knowledge is also relevant to the formalization of software

agents and the shaping of virtual institutions and multi agent systems or environments This book explores the use of ontologism in legal knowledge representation for semantically enhanced legal knowledge systems or web based applications In it current methodologies tools and languages used for ontology development are revised and the book includes an exhaustive revision of existing ontologies in the legal domain The development of the Ontology of Professional Judicial Knowledge OPJK is presented as a case study

Knowledge Service Engineering Handbook Jussi Kantola, Waldemar Karwowski, 2012-05-17 Edited by Jussi Kantola the founding faculty member of the world s first university Knowledge Service Engineering Department at Korea Advanced Institute of Science and Technology and Waldemar Karwowski from the Department of Industrial Engineering and Management Systems at UCF Knowledge Service Engineering Handbook defines what knowledge services engineering means and how it is different from service engineering and service production This groundbreaking handbook explores recent advances in knowledge service engineering from the accomplished researchers and practitioners in this field from around the world and provides engineering systemic industry and consumer use viewpoints to knowledge service systems and engineering paradigms The handbook outlines how to acquire and utilize knowledge in the 21st century presenting multiple cultural aspects including US European and Asian perspectives Organized into four parts it begins with an introduction to the main concepts of knowledge services It then explores data information and knowledge based engineering methods and applications that can be used to develop knowledge services followed by discussions of the importance of human networks in knowledge services The handbook concludes with descriptions of high performance knowledge service systems This structure allows different uses the information can be looked up as needed or read in the order presented As with any new field the excitement lies in seeing how to combine these advances in data information and human parts of knowledge services in the future While most books on this subject concentrate on data information or knowledge this handbook integrates coverage of all three thus providing a complete examination of sustainable knowledge services The handbook has been carefully designed to be of use to professionals who develop new knowledge services and related businesses for academic researchers and lecturers to start new research projects and for students studying knowledge services knowledge service production and knowledge service business

AI Approaches to the Complexity of Legal Systems Pompeu Casanovas, Ugo Pagallo, Giovanni Sartor, Gianmaria Ajani, 2010-10-21 The inspiring idea of this workshop series Artificial Intelligence Approaches to the Complexity of Legal Systems AICOL is to develop models of legal knowledge concerning organization structure and content in order to promote mutual understanding and communication between different systems and cultures Complexity and complex systems describe recent developments in AI and law legal theory argumentation the Semantic Web and multi agent systems The aim of the AICOL workshops is thus to offer effective support for the exchange of knowledge and methodological approaches between scholars from different scientific fields by highlighting their similarities and differences The comparison of multiple formal approaches to the law

such as logical models cognitive theories argumentation frameworks graph theory game theory as well as opposite perspectives like internal and the external viewpoints this volume stresses possible convergences as for instance are possible in the realms of conceptual structures argumentation schemes emergent behaviors learning evolution adaptation and simulation This volume assembles 15 thoroughly refereed and revised papers selected from two workshops organized at the XXIV World Congress of Philosophy of Law and Social Philosophy IVR Beijing China September 15 20 2009 and at JURIX 09 December 16 19 2009 Rotterdam The papers are organized in topical sections on language and complex systems in law ontologies and the representation of legal knowledge argumentation and logics as well as dialogue and legal multimedia

Data Mining: Foundations and Practice Tsau Young Lin, Ying Xie, Anita Wasilewska, Churn-Jung Liau, 2008-08-20. The IEEE ICDM 2004 workshop on the Foundation of Data Mining and the IEEE ICDM 2005 workshop on the Foundation of Semantic Oriented Data and Web Mining focused on topics ranging from the foundations of data mining to new data mining paradigms. The workshops brought together both data mining researchers and practitioners to discuss these two topics while seeking solutions to long standing data mining problems and stimulating new data mining research directions. We feel that the papers

presented at these workshops may encourage the study of data mining as a scientific field and spark new communications and collaborations between researchers and practitioners To express the visions forged in the workshops to a wider range of data mining researchers and practitioners and foster active participation in the study of foundations of data mining we edited this volume by involving extended and updated versions of selected papers presented at those workshops as well as some other relevant contributions The content of this book includes studies of foundations of data mining from theoretical practical algorithmical and managerial perspectives The following is a brief summary of the papers contained in this book
