This simplifies camera operation when leaving the camera to friends or when you know you only want to shoot in one mode.

The shutter button is disabled in "One Button Mode" and will not start or stop the recording while the camera is on. "One Button Mode" is convenient when you only want to shoot one type of video or photos and prefer to simplify operation to be either "on and recording" or "off with only the power button being used to operate the camera. This is a great "Simple Mode" for leaving the camera to friends.

Symbol on LCD Screen	Function
Cent (default setting)	Center weighted average meter is best for normal outdoor and indoor lighting conditions.
SPt	Spot meter is primarily for shooting from inside a car or other dark space looking out into a brighter outside setting. Spot meter adjusts the exposure for the absolute center of the scene, for example the road ahead instead of the interior of the car. If you are wanting optimum exposure of the inside of the car, filming mainly the driver for example, choose On center weighted average meter for the inside of the car.

### 1. Press the SHUTTER button to toggle between choices.

2. Press the POWER/MODE button to save whichever setting is showing on the screen and continue to the next feature option.

## UPSIDE DOWN IMAGE CAPTURE

If you need to mount your camera upside down to get the perfect photo or video angle, you can program the camera to save the photos or video upside down so that it appears right side up when you review it on your computer or TV. This eliminates the need to "flip" the photo or video later on your computer.

Symbol on LCD Screen	Function
UP (default setting)	Saves photos and videos in a normal "right side up" orientation.
UPd	When photos or videos are saved to your computer or TV, the video camera and photo icons will blink quickly on the LCD screen to remind you that you are saving photos and videos upside down.

### 1. Press the SHUTTER button to toggle between the UP / UPd choices.

2. Press the POWER/MODE button to save whichever setting is showing on the screen and continue to the next feature option.

## SETTING VIDEO LIVE FEED ON / OFF

You can set your camera to send a live video signal out the side TV or HDMI ports by toggling the VIDEO LIVE FEED setting on and off. Video Live Feed is not available if the USB port is not available. When Video Live Feed is set to OFF (UPd) the camera will switch into video / photo playback mode when one of the included TV cables are plugged into the camera. Video Live Feed is set to ON (UP) and the camera will switch into normal camera mode when plugged into a TV and will send a live video signal to the TV. Plugging in the component cable will send an HD video signal out from the camera, and plugging in the composite cable will send a standard definition signal out from the camera. Video Live Feed On allows for plugging the camera into wireless transmitters and TVs for live viewing from the camera. NOTE: If the component cable is used to send live HD video out from the camera, and you begin simultaneously recording HD video to the SD card, the live video feed will be reduced to standard definition as the camera cannot record and transmit HD video at the same time. If you wish to have an HD live video feed from the camera you cannot begin recording HD video to the SD card. If the composite cable is used to send standard definition video out from the camera, when the camera can simultaneously record HD video to the SD card.
