 far too many people out there who are under the impression that you cannot have a beautiful garden without spending huge
 amounts of money That is so not true A little bit of planning and this fallacy is going to fall to pieces by the wayside Those
 who are grown annuals for years are going to give this statement the lie gladly Their initial investment must have been just a
 packet of seeds The next year the plants were grown from the seeds collected from the previous years crop Do not forget that
 the life of an annual is limited to just 12 months and so you must not expect them to grow up and bloom again the next year
 unless of course you allowed the seeds to lie in the bed without collecting them That is when they are going to bloom up just
 like weeds with a little bit of rain and with the coming of the spring One of the great advantages of annuals is that they are
 quite easy to grow and flourish in your garden over a long period The most common are well known to even amateur
 gardeners who can recognize a cornflower nasturtiums Virginia stock and Candytuft These are very beautiful in themselves
