at Home Dennis DeLaurier,2024-03-24 INTRODUCTION Why I wrote this book I have been growing my food for many years As I write this book it is March 11 2024 As I grow and purchase food for my family I can see a food shortage in the U S in the coming years of 2024 2025 So this book is about food security and for those who never grew any of their food No matter where you live you can grow your food If prices keep getting inflated to the point that you can no longer afford it it won t matter if it is piled high There are real food supply problems facing the global population If you don t believe any of this then ask yourself why have food prices risen so fast lately One thing is certain the US is much better off than the rest of the global community as North America grows much of its food And yes the US is part of North America Where the real problems lie is in the rest of the world where there are real climate induced shortages The climate has NOTHING to do with CO2 2024 2025 may see real starvation in some locations as globally there will not be enough food to go around We are now starting to see the same climate problems devastating the UK and EU here in the US Most western parts of the US are seeing drought and it seems to be moving east This drought has caused the Mississippi River to dry up and completely stop barge traffic and commodity deliveries The author of this book lives in Central Texas and it was very hot and dry from the start of spring and has not let up much in late October Almost all the cotton south of here failed for lack of rain If I had to survive on the food I produced this year it would have been difficult What the heat and the drought didn t get the bugs especially grasshoppers did So what is it all about in this book GROWING FOOD AT HOME Over and over I will say It s time to grow your own food or Start a garden The answer is probably 99% or more of people alive in the US have never missed a meal For almost the last 90 years the US has enjoyed just about anything it ever needed or wanted So the feeling is that it s just the way things are and they will never change THAT IS ABOUT TO CHANGE **Herbs: Culinary, Medicinal, Aromatic (Secrets and Human Happiness)**

herbs used for millenniums have been an important part of our social traditional and religious fabrics all over the world No one without an interest in nature is not going to know more about Rosemary sage lavender thyme hyssop basil and other herbs put into use down the centuries The awareness of the medical as well as the edible qualities of herbs was naturally gained in prehistoric days by happy and sad experience When food was nasty tasting or scarce the pungent herbs made it more delicious and acceptable to eat Leafy herbs provided vegetables and salads Soon people began to find out that some herbs would also heal wounds and ease suffering So that means that even the herbs that we supposedly used for culinary purposes could be used for healing purposes In 460 B C Greeks were writing about the curative powers of plants In the East these herbs were used in alternative medicine through medical books and compendiums written more than 5000 years ago In Europe all medical treatment based on herbs was done thanks to a book written by Dioscorides in A D 60 In ancient Europe The Greeks Egyptians and the Romans could not do without their herbs Culinary delights especially the blending of sauces which were made of flowers herbs spices and wines were possibly started in a Greek country named Sybaris from where we get the term sybarite or a person who enjoys pleasure They were the people who made sleeping on rose petals a fashion All the herbs and the flowers which were used to keep the Sybarites happy were grown in the gardens in the plains of Possidonia and you can still see them today The regular use of a large variety of flowers and herbs for medical and culinary purposes has just come down the ages to us since ancient times However in the early mid 19th century with the rise of industrialization the popularity of herbs began to grow lesser because people started to clear up large tracts of lands on which herbs grew to give way to cities and human settlements In fact one great forest in the USA Limberlost made popular in the writings of a writer and naturalist Gene Stratton Porter was totally destroyed due to the felling of timber If Teddy Roosevelt was not such an ardent and dedicated naturalist many of the great green forest areas of the USA which are now natural forest reserves with herbs still present in them would have been destroyed through man s encroachment and greed So apart from these herbs still available in the wilderness this book is going to tell you how to make an Herb gardening your own house Thanks to the revival of interest and appreciation of herbs in the 21st century to heal and to cure and to beautify you people with gardens are realizing the beauty of herbal plants They are also learning the added pleasure of growing them in their garden so that they can use these herbs freshly picked People living in flats are raising these herbs on windowsills by planting them in window boxes In town gardens you can grow them in wooden tubs boxes and even in large pots on balconies and in your backyards
