Growth Poverty And Inequality Eastern Europe And The Former Soviet Union:

Growth, Poverty and Inequality Mamta Murthi, Ruslan Yemtsov, Edmundo Murrugarra, Nora Dudwick, Ellen Hamilton, Erwin Tiongson, 2005 A most interesting report I have read it with considerable interest and have learned a lot It tells a clear story and it contains a lot of interesting material Anthony Atkinson Professor Nuffield College Oxford University United Kingdom The key conclusion of the report is that rapid economic growth is fundamentally important for job creation and consequently reducing poverty Ewa Balcerowicz President of the Board Center for Social and Economic Research Warsaw Poland While the countries of Eastern Europe and the Former Soviet Union have made significant progress in reducing poverty in the past five years poverty and vulnerability remain significant problems More than 60 million are poor and more than 150 million are vulnerable Most of the poor are the working poor Many others face deprivations in terms of access and quality of public services Regional inequalities both between and within countries are large The highest levels of absolute poverty are found in the poor countries of Central Asia and the South Caucasus but most of the region's poor and vulnerable are in middle income countries Growth Poverty and Inequality examines these important issues and recommends that public policies focus on accelerating shared growth and job creation improving public service delivery strengthening social protection and enhancing the monitoring of progress in poverty reduction This book will be informative for policy makers and social scientists working in the Region *Annual World Bank Conference on Development Economics Regional 2007* François Bourguignon, Boris Pleskovic, 2007-01-01 Global Development Finance GDF is the World Bank's annual review of recent trends in and prospects for financial flows to developing countries It is an indispensable resource for governments economists investors financial consultants academics bankers and the entire development community Vol I Analysis and Outlook reviews recent trends in financial flows to developing countries Also available as a two volume set Vol II Summary and Country Tables includes comprehensive data for 138 countries as well as summary data for regions and income groups

Exclusion and Poverty in India and Central Asia Chittaranjan Senapati, 2016-09-09 The early years of 1990s economic reform and change has neglected social sectors both in India and Central Asia As a result poverty has also increased in India and Central Asian countries The economic political and social situation has worsened in all Central Asian states due to transition from command economy to market economy The early 1990s political decision has been dominated by a narrowly conceived version of economic policy for both India and Central Asia As a result the quality and the structure of social protection changed in a negative way Indeed in some cases the pursuit of a strict economic orthodoxy has left various sections of the community marginalized and alienated Both the societies confront a number of challenges that is as profound as the economic changes of the past The process of globalization and technical change has influenced economy and society in complex ways including raising expectations of consumption and remuneration for skilled knowledge workers creating greater demand for some information skills and services causing unemployment amongst those with few qualifications and

destabilizing some traditional ways of life and increasing social exclusion It detaches groups and individuals from social relations and institutions and prevents them from full participation in the normal activities of the society In India and Central Asia communities face social exclusion on the basis of their identity as ethnic groups socio economic groups religious community and gender Inclusive development therefore is essential and it should be the top priority in development programs of India and Central Asia Research in this area has not been touched upon so far Since Central Asian countries are relatively new and trying to establish their democratic institutions this piece of work will be helpful for their nation building processes So far as the mutual benefit for both the regions is concerned India is an old democracy and its inclusive policy can be lessons for Central Asian countries On the other hand the experience of Central Asias policy implementation can be a lesson for India This piece of work has potential impulses to policy makers academicians and researchers of these five Central Asian countries and India This work can make a distinction than the conventional researcher in India by focusing on development studies social exclusion inclusive policies and comparative studies in international developments Key words social exclusion poverty deprivation development diversity India Central Asia Kazakhstan Kyrgyzstan Tajikistan Turkmenistan and Uzbekistan

East Central Europe and the former Soviet Union Michael Bradshaw, Alison Stenning, 2016-04-15 A comprehensive introduction to the important economic social and political processes and development issues in this increasingly popular area of study Employing a groundbreaking thematic approach the book centres its discussion on the interrelation between contemporary development theories and continuing transition issues in this huge and complex region

The Eurasian Wheat Belt and Food Security Sergio Gomez y Paloma, Sébastien Mary, Stephen Langrell, Pavel Ciaian, 2016-10-11 This book provides an in depth analysis of the wheat production developments in the Eurasian region and assesses the potential contribution of the region to domestic and international food security In particular the book covers policy and institutional developments of the agricultural sector in Eurasia with a special focus on the horizontal issues relevant to the current and future potential growth of the wheat production such as land policy credit and finance privatization farm restructuring and environmental challenges Global food security is a major societal concern in the light of an increasing population which is projected to grow from around seven billion today to almost 10 billion in 2050 Two most likely ways to achieve the much needed food production growth are expansion of land cultivation or increase in crop yields and total factor productivity The only region with a significant amount of uncultivated arable land that is at the same time experiencing rising agricultural productivity is the Eurasian wheat belt comprising of Russia Ukraine Kazakhstan and the Central Asian countries Uzbekistan Tajikistan Turkmenistan and Kirgizstan This makes the region a potential hotspot for driving the future growth of global

agriculture Such prospects require a detailed investigation of Eurasia's future perspectives in terms of food production with a focus on wheat and its potential contribution to regional and global food security World Of Work Report 2008

Academic, *How Ukraine Became a Market Economy and Democracy* Anders Åslund, 2009-03-01 One of Europe's old nations steeped in history Ukraine is today an undisputed independent state It is a democracy and has transformed into a market economy with predominant private ownership Ukraine's postcommunist transition has been one of the most protracted and socially costly but it has taken the country to a desirable destination Åslund's vivid account of Ukraine's journey begins with a brief background where he discusses the implications of Ukraine's history the awakening of society because of Mikhail Gorbachev's reforms the early democratization and the impact of the ill-fated Soviet economic reforms He then turns to the reign of President Leonid Kravchuk from 1991 to 1994 the only salient achievement of which was nation building while the economy collapsed in the midst of hyperinflation The first two years of Leonid Kuchma's presidency from 1994 to 1996 were characterized by substantial achievements notably financial stabilization and mass privatization The period 1996-99 was a miserable period of policy stagnation rent seeking and continued economic decline In 2000 hope returned to Ukraine Viktor Yushchenko became prime minister and launched vigorous reforms to cleanse the economy from corruption and economic growth returned The ensuing period 2001-04 amounted to a competitive oligarchy It was quite pluralist although repression increased Economic growth was high The year 2004 witnessed the most joyful period in Ukraine the Orange Revolution which represented Ukraine's democratic breakthrough with Yushchenko as its hero The postrevolution period however has been characterized by great domestic political instability a renewed explicit Russian threat to Ukraine's sovereignty and a severe financial crisis The answers to these challenges lie in how soon the European Union fully recognizes Ukraine's long expressed identity as a European state how swiftly Ukraine improves its malfunctioning constitutional order and how promptly it addresses corruption

Putin Richard Sakwa, 2007-11-13 The new edition of this extremely well received political biography of Vladimir Putin builds on the strengths of the first edition to provide the most detailed and nuanced account of the man his politics and his profound influence on Russian politics foreign policy and society New to this edition analysis of Putin's second term as President more biographical information in the light of recent research detailed discussion of changes to the policy process and the lites around Putin developments in state society relations including the conflicts with oligarchs such as Khodorkovsky review of changes affecting the party system and electoral legislation including the development of federalism in Russia details on economic performance under Putin including more discussion of the energy sector and pipeline politics Russia's relationship with NATO after the big bang enlargement EU Russian relations after enlargement and Russia's relations with other post-Soviet states the conclusion brings us up to date with debates over the question of democracy in Russia today and the nature of Putin's leadership and his place in the world Putin is essential reading for all scholars and students of Russian politics *Beyond Varieties of Capitalism* Bob

Hancké, Martin Rhodes, Mark Thatcher, 2007-05-17 Since the early 1990s Europe's economies have been facing several new challenges the single market programme the collapse of the Berlin wall and eastward enlargement and monetary unification Building on the influential Varieties of Capitalism VoC perspective first elaborated in detail in the book Varieties of Capitalism OUP 2001 this book critically analyzes these developments in the European political economy and their effects on the continental European economies Leading political economists from Europe and the US debate how VoC can help understand the political economic challenges that Europe is facing today and how understanding these new challenges can in turn enrich and enhance the VoC perspective Thematically the contributions to this volume are organised in four sections how the macro economics of EMU have influenced different European models of capitalism how the Single Market programme was received in the different institutional regimes in European capitalism how welfare and labour market reforms are debated and implemented how European capitalism travelled east after 1989 Preceding this is a spirited defence of the VoC approach by Peter Hall and an introduction from the volume editors considering the approach and proposing extensions and amendments This book demonstrates that the VoC approach remains as the editors put it in their introduction a rich seam to mine capable of accommodating new developments and theoretically flexible enough to produce new and innovative hypotheses and arguments

Europe and Central Asia: Regional Overview of Food Insecurity 2016 Food and Agriculture Organization of the United Nations, 2018-05-28 The nature of food insecurity in Europe and Central Asia has changed substantially over the past 23 years due to pro poor economic growth particularly in the region's less wealthy countries Today the main household food insecurity issues concern malnutrition rather than a lack of access to food

Varieties of Capitalism in Post-Communist Countries D. Lane, M. Myant, 2016-01-23 This book sets the experiences of former communist countries as they head towards capitalism against the varieties of capitalism paradigm and provides a framework for comparing transformation processes demonstrating how differing heritages of communist and pre communist pasts are leading to different kinds of capitalist economies

Personal Wealth from a Global Perspective James B. Davies, 2008-11-13 There is great media fascination in the activities and lifestyles of the super rich But personal wealth is also important for those of more modest means as a store of potential consumption as a cushion against emergencies and as collateral for business and investment loans This book is the first global study of household assets and debts It documents not only the level distribution and trend of wealth holdings in rich nations but also addresses developing countries like China and India The situation in Latin America and Africa is given attention along with the experiences of Russia and other transition countries Components of household wealth like financial assets land and property are examined as well as the gender division Worldwide it is estimated that the richest 2% own more than half of total global wealth and that this elite group resides almost exclusively in North America Western Europe and rich Asia Pacific countries

Black Sea and Central Asia Promoting Work and Well-Being OECD, 2008-06-11 This book analyses the opportunities and conditions of

employment throughout the Black Sea region and Central Asia It examines how different countries deal with social issues affecting well being *Global Energy Security and American Hegemony* Doug Stokes, Sam Raphael, 2010-06-07 This analysis of the United States and energy security examines the close relationship between US military supremacy in oil rich regions and America's maintenance of global power Energy security generally evokes thoughts of American intervention in the Middle East to protect US interests in that region's oil rich fields Doug Stokes and Sam Raphael move beyond that framework to consider US actions in Latin America Central Asia and Africa Drawing on State and Defense Department records and other primary sources and previous scholarship they show how US foreign policy since World War II has sought to maintain a global energy security regime that supports the nation's allies while maintaining American hegemony Stokes and Raphael explain how US intervention in energy rich states insulates and stabilizes those nations transnationally oriented actors and political economies and why American oil diversification strategy strengthens the country's position against rivals in the global capitalist system They argue that counterinsurgency aid and other types of coercive US statecraft protect the recipient states from an array of potentially revolutionary armed and unarmed internal social forces thereby securing the energy supplies of nations deemed strategically important to the United States or its allies Clear and accessible this cutting edge contemporary policy analysis will engage scholars of US foreign policy and international relations as well as policymakers grappling with the importance of energy security in today's world

Converging Europe Ipek Eren Vural, 2016-05-13 Converging Europe evaluates the impact of European integration on social policy development since the launch and re-launch of the Lisbon strategy discussing the challenges posed by the still unfolding global economic crisis of 2007-2009 Given the unsettling economic conditions does European coordination of social policies generate more social cohesion and integration or growing xenophobia nationalism and exclusion Informed by diverse theoretical perspectives this book brings together a team of international experts working on an extensive range of policy issues central to the Lisbon agenda such as labour market policies social protection systems and social exclusion poverty Contributions assess the interfaces between European integration the Lisbon strategy and social policy in three groups of countries related to the EU old member states the new member states and a candidate country Turkey The richness of content and data allows rigorous analysis and critical comparative insights not only on the social outcomes of the Lisbon strategy but also more broadly on the dynamics and dimensions of European social policy Pioneering the scholarly reflections on the repercussions of the global economic crisis of 2007-2009 for both the road map drawn at Lisbon and viability of national systems of social provision in Europe this book is an important acquisition for policy makers and academics alike

Explores and compares a variety of approaches to social policy [Popular Mobilization and Empowerment in Georgia's Rose](#)

[Revolution](#) Kelli Hash-Gonzalez, 2012-10-18 While other studies explain the Rose Revolution in terms of the contribution of the power players Popular Mobilization and Empowerment in Georgia's Rose Revolution by Kelli Hash Gonzalez adds to our understanding of the event by examining it from the perspective of ordinary citizens Hash Gonzalez shows how the movement frames targeted people's emotions as well as their beliefs and values to more effectively mobilize them for action Using the election fraud as a focal point movement leaders and activists amplified the emotions and beliefs incorporated in the themes of injustice dignity and duty which supported movement participation They also appealed to people's emotions and beliefs in an effort to transform the common frame of political powerlessness which worked against participation The book also examines the role that emotional energy played in mobilization The achievement of a critical mass of protestors was surprising given the hopelessness cynicism and alienation in the region's political culture This level of participation was

essential for movement emergence and success Without the people none of the other necessary factors NGOs civil society financial resources foreign support or interference the media government vulnerability political elites opposition unity could have achieved a legitimate regime change Popular Mobilization and Empowerment in Georgia s Rose Revolution is an in depth examination of a significant political moment from the perspective of the people who lived it
