Linear Algebra and Matrices Helene Shapiro, 2015-10-08 Linear algebra and matrix theory are fundamental tools for almost every area of mathematics, both pure and applied. This book combines coverage of core topics with an introduction to some areas in which linear algebra plays a key role, for example, block designs, directed graphs, error correcting codes, and linear dynamical systems. Notable features include a discussion of the Weyr characteristic and Weyr canonical forms and their relationship to the better known Jordan canonical form; the use of block cyclic matrices and directed graphs to prove Frobenius's theorem on the structure of the eigenvalues of a nonnegative irreducible matrix; and the inclusion of such combinatorial topics as BIBDs, Hadamard matrices, and strongly regular graphs.

Also included are McCoy's theorem about matrices with property P, the Bruck-Ryser-Chowla theorem on the existence of block designs and an introduction to Markov chains. This book is intended for those who are familiar with the linear algebra covered in a typical first course and are interested in learning more advanced results.

Linear Algebra and Its Applications

David C. Lay, 2011-11-21. Linear algebra is relatively easy for students during the early stages of the course when the material is presented in a familiar, concrete setting. But when abstract concepts are introduced, students often hit a brick wall. Instructors seem to agree that certain concepts such as linear independence, spanning, subspace, vector space, and linear transformations are not easily understood and require time to assimilate. Since they are fundamental to the study of linear algebra, students' understanding of these concepts is vital to their mastery of the subject. David Lay introduces these concepts early in a

familiar concrete $\mathbb{R}^n$ setting develops them gradually and returns to them again and again throughout the text so that when discussed in the abstract these concepts are more accessible Note This is the standalone book if you want the book access card order the ISBN below 0321399145 9780321399144 Linear Algebra plus MyMathLab Getting Started Kit for Linear Algebra and Its Applications Package consists of 0321385179 9780321385178 Linear Algebra and Its Applications 0321431308 9780321431301 MyMathLab MyStatLab Glue in Access Card 0321654064 9780321654069 MyMathLab Inside Star Sticker
