Keenan, 2014 Technology is rapidly moving into our bodies writes cyber expert Keenan and this book gives a chilling look ahead into where that road may lead us on a one way trip to the total surrender of privacy and the commoditization of intimacy Here is the definitive dissection of privacy eroding and life invading technologies coming at you from governments corporations and the person next door Take for example Girls Around Me a Russian made iPhone App that allowed anyone to scan the immediate vicinity for girls and women who checked in on Foursquare and had poorly secured Facebook profiles It combined this information in a way never intended by the original poster Going to a Disney theme park Your creepy new MagicBand will alert Minnie Mouse that you re on the way and she ll know your kid s name when you approach her Thinking about sending your DNA off to Ancestry com for some genetic genealogy Perhaps you should think again your genetic information could be used against you This masterful weaving of the negatives and positives of technology makes for a book that is realistic about technology s perils yet optimistic about it s great potential Foreword Reviews **A Startup Field Guide in the Age of Robots and AI** Oliver Mitchell, 2025-06-18 Launching a startup is like climbing a mountain just maybe more treacherous I say this as I have spent years as a backpacker and entrepreneur While hiking through the Alaskan Tundra I feared brown bears and crevasses Yet nothing prepared me for the responsibility of payroll for over 200 families relying on my business plan to feed their children Unlike traditional software the mere smell of hardware sensors and robot gearing sends shivers through most investors with red flags arising from the perceived capital inefficiencies and intense research and development This is coupled with a high talent requirement before launching even a minimum viable product as these inventions demand a cross section of skills mechanical electrical and software engineering To set out on the trail of uncrewed success machine inventors and founders require a detailed field guide to meet customer demand and financing objectives My goal for this book is to help you at a pivotal point in your ideation process and at the same time introduce you to a cadre of potential mentors Through interviews

with some of the most respected luminaries in this field I aim to help fortify your resolve to follow your passions and build a billion dollar company The chapters of this book have been organized like a field guide as if you are setting out on a trip in the wild Just like it s essential to satiate yourself before scaling mountains fast tracking your innovation into the hands of early adopters is vital for achieving success on Main Street
