GPS for Mariners, 2nd Edition Robert J. Sweet, 2011-07-08 From the National Education Officer of the U S Power Squadrons here is the operator s manual that should come with every boater s GPS receiver or chart plotter About the Book GPS for Mariners was immediately well received by nautical book buyers because it took the mystery out of what was in 2003 still a somewhat mysterious black box Sales of the book have been strong ever since through the U S Power Squadrons and the U S Coast Guard Auxiliary as well as through bookstores and marine stores In the intervening six years however GPS has achieved almost universal acceptance No one needs to be told in detail how the system works or why it is reliable anymore Boaters today accept GPS as the ultimate navigation tool they just want to know how to use it At the same time even the most basic GPS receivers are much more full featured now than six years ago It s hard to find a new GPS receiver even a handheld

unit that doesn't have resident charts or maps for example And many boaters now buy chart plotters with integral GPS and the distinction between a GPS receiver and a full featured chart plotter has become increasingly blurred About the only thing that hasn't changed is that the manual that comes with a new GPS receiver or chart plotter is as confusing fragmented and incomplete as ever and in all likelihood never even mentions nautical applications because GPS manufacturers cater to the larger nonboating markets In response to these trends the second edition of GPS for Mariners will have much less GPS tech talk and theory no sense preaching to the converted and more instead on getting the most out of today's more advanced and powerful units And the second edition will be presented in full color to do maximum justice to the many screen shots and electronic chart shots the book will feature thus faithfully replicating the full color screens of most of today's GPS receivers and chart plotters Revamped coverage and emphasis Boaters no longer need to be told what GPS is They just want to know what it will do for them and how to use it Therefore this new edition eliminates theory and adds brand new content on the features and capabilities of new GPS receivers and chart plotters Now in full color Because marine GPS receivers and chart plotters have made the transition to color displays since the first edition was published so has the book The second edition will be printed entirely in color the better to show the many features of GPS and chart plotters Distinctive author qualifications Bob Sweet is not only a successful boating book author but also the National Education Officer of the U S Power Squadrons America's largest non profit boating organization and boating educator The manual that should have come with your GPS or chartplotter but didn't Clear concise advice on how to install and initialize the unit how to use its various features and how to interpret what it tells you Color screen shots of the displays take the mystery out of interpretation Learn basic and advanced functions Use the device for advance route planning as well as en route navigation Become an informed GPS buyer as well as an informed GPS user Learn the ins and outs of navigation software Interface your GPS with a PC radar or autopilot

Don't Drive Be Driven Chris Isbell, 2008-06-19 BUILD A BUSINESS TO SERVE YOUR LIFE SO YOU CAN BE FREE TO LIVE YOUR LIFE If you left your small business for a month would it make it What about if you left for a year Most small business owners couldn't dream of doing this yet this is what separates the big companies from the small Benjamin Franklin said Drive thy business or it will drive thee This assumes your business will drive you in the wrong direction However is there a way where it could drive you in the right direction Can you create a business where you simply speak and you will be taken you to your destination In this book you will learn three main components that must be present in your business allowing your business to chauffeur you to your goals The GPS System The first necessary component for your business is a GPS or navigational system We will discuss a simple effective way to build this so it can guide or drive your business towards the goals you want to achieve The 4 Vehicles Within the Systems of your GPS there are 4 Business Vehicles present in every business including yours that serve to drive the business and you to an intended destination We will define these Vehicles and the functions of each The Dashboard Your car has a dashboard with specific gauges on it These tell you if
