Ancient Kingdoms of West Africa Dierk Lange, 2004 Sub Saharan African history does not feature in the world history

of the classical period because it continues to be dominated by an emphasis on local paradigms Using hitherto unexplored sources this study places parts of West and also East Africa on the map for the ancient world It shows in particular that the main clan and state structures of several West African kingdoms are based on the same dualistic pattern as that of the Canaanite Israelite and hence also Phoenician societies Supported by written records oral traditions and cult dramatic performances these similarities suggest the existence of early trans Saharan contacts reaching back to the pre Roman period The Phoenician slave trade appears to have been the single most important factor explaining the transfer of these organizational forms from North Africa to the sub Saharan region where they are particularly prominent in the Hausa and Yoruba societies Similar social institutions were transmitted from the Semitic world to the Horn of Africa as a result of the ancient myrrh and frankincense trade Their subsequent contextualization and local adaptation led to the rise of a number of great kingdoms in West and East Africa Some of these polities grew so powerful that they conquered and controlled the successor states of their former metropolitan suzerains Dealing with regional history as well the volume presents the development of the West African empires of Ghana Mali and Songhay from the new perspective of ethnogenesis There are numerous original maps charts and photographs to illustrate the text Dierk Lange is Professor of African History at the University of Bayreuth in Germany He presents here the results of more than thirty years of research devoted to the history of Africa and explains his more recent focus on relations with Phoenician North Africa Before his appointment in Bayreuth he studied African and Islamic history as well as anthropology in Paris worked on Arabic texts for four years in Cairo and taught African and Islamic history for five years at the University of Niamey He crossed the Sahara several times and undertook more than fifteen research trips to Nigeria Niger and Chad His publications in three languages include two books numerous articles in learned journals and two contributions to the UNESCO history of Africa He is unique in comparing African cultural forms with those of the ancient Near East

Women in Yoruba Religions Oyèrónké Oládém?, 2022-07-19 Uncovering the influence of Yoruba culture on women's religious lives and leadership in religions practiced by Yoruba people, *Women in Yoruba Religions* examines the profound influence of Yoruba culture in Yoruba religion, Christianity, Islam, and Afro-Diasporic religions such as Santería and Candomblé, placing gender relations in historical and social contexts. While the coming of Christianity and Islam to Yorubaland has posed significant challenges to Yoruba gender relations by propagating patriarchal gender roles, the resources within Yoruba culture have enabled women to contest the full acceptance of those new norms. Oyeronke Olademo asserts that Yoruba women attain and wield agency in family and society through their economic and religious roles and Yoruba operate within a system of gender balance so that neither of the sexes can be subsumed in the other. Olademo utilizes historical and phenomenological methods incorporating impressive data from interviews and participant observation, showing how religion is at the core of Yoruba lived experiences and is intricately bound up in all sectors of daily life in Yorubaland and abroad in the diaspora.
