Kinicki Williams Management 6th Edition:

Enhancing the Managerial DNA of Your Small Business Pat Roberson-Saunders, Barron H. Harvey, 2014-04-30 Most people who start businesses do so with little or no experience and no formal education in business or management training. If this sounds familiar, this book has been written expressly for you and anyone who aspires to create a business. This book fills some critical gaps in managerial knowledge that cause many of the problems that small business owners face as they try to navigate the business world with inadequate knowledge of how to manage a business. Inside, you will learn five core topics that will make the difference between success and failure: strategic planning, financing, marketing, managing cash flow, and managing costs. This book also incorporates three topics that are very important to small businesses: break-even analysis, legal business structures, and intellectual property protection.

Educational Leadership and Organizational Management Victor C.X. Wang, Bernice Bain, John Hope, Catherine A. Hansman, 2016-10-01 This book is intended for students, leaders, and managers who wish to explore the personal relevance and conceptual bases of educational leadership and organizational management and to develop their expertise in this field. It is a book written for both scholars and practitioners. The general public will also appreciate the accessible language in the book. There are two goals in the experiential learning process. One is to learn the specifics of a particular subject matter; in this case, educational leadership and organizational management. The other is to learn about one's own strengths and weaknesses as a learner. This book is focused on the analysis of prevalent theories and concepts and their application to the development of leadership and management skills and the knowledge and attitudes required to solve real-world problems in the workplace. For decades, students have focused their studies of educational leadership and organizational management theories in classroom settings without actual opportunities to apply these theories in the workplace. A profound and significant lesson learned in history is that we must follow the principle of integrating theory with practice: unity of theory with practice. Then we can follow the policy of walking on two legs, an analogy made by the late Chinese chairman Mao Ze Dong.

Coming in from the Margins Connie Schroeder, 2023-07-03 Why is it critical for faculty development centers to reexamine their core mission today The core argument of this book that a necessary and significant role change is underway in faculty development is a call for centers to merge the traditional responsibilities and services of the past several decades with a leadership role as organizational developers Failing collectively to define and outline the dimensions and expertise of this new role puts centers at risk of not only marginalization but of dissolution When a TLC is busy and in demand it is hard to believe that it may be despite all the activity and palpable array of daily outcomes institutionally marginalized The actual and increasing potential of marginalization and center closings may help motivate this field to recognize the danger of complacency or remaining stuck in an old paradigm that exclusively defines itself as

instructional development or supportive service Proposing a newly defined organizational development role for academic and faculty developers and directors of teaching and learning centers Coming in from the Margins examines how significant involvement in broader institutional change initiatives is becoming a critical aspect of this work Although undefined and unrecognized as a significant dimension of this work the organizational development role increasingly demanded of developers is far more attuned with the demand for change facing higher education than ever before The book provides evidence based research into what directors of centers are currently doing as organizational developers and how they shape influence and plan institutional initiatives that intersect with teaching and learning Directors of centers their supervisors and leaders in the field provide models from a wide range of institutional contexts as well as the strategies they have employed to successfully engage in significant organizational development They also demonstrate how they handled the challenges that ensued The strategies in each chapter provide a practical resource and guide for re examining the mission and structure of existing centers or for designing new centers of teaching and learning and most importantly to develop their role as change agents The book covers such topics as Center mission statements Center staffing Center advisory boards committee involvement unique expertise knowledge and skills embedding Centers in strategic planning Center vision organizational change processes collaboration and partnerships institutional priorities and initiatives relationships with upper administration
