Multigenerational Family Living Edgar Liu, Hazel Easthope, 2016-11-03 Multigenerational living where

more than one generation of related adults cohabit in the same dwelling is recognized as a common arrangement amongst many Asian Middle Eastern and Southern European cultures but this arrangement is becoming increasingly familiar in many Western societies Much Western research on multigenerational households has highlighted young adults delayed first home leaving the result of difficult economic prospects and the prolonged adolescence of generation Y This book shows that the causes and results of this phenomenon are more complex The book sheds fresh light on a range of structural and social drivers that have led multigenerational families to cohabit and the ways in which families negotiate the dynamic interactions amongst these drivers in their everyday lives It critically examines factors such as demographics the environment culture and family considerations of identity health care and well being revealing how such factors reflect and are reflected by a retracting welfare state and changing understandings of families in an increasingly mobile world Based on a series of qualitative and quantitative research projects conducted in Australia the book provides an interdisciplinary examination of intergenerational cohabitation that explores a variety of concerns and experiences It will appeal to scholars across the social sciences with interests in housing demographics and the sociology of the family

Age and the Reach of Sociological Imagination Dale Dannefer, 2021-08-09 The dominant narratives of both science and popular culture typically define aging and human development as self-contained individual matters failing to recognize the degree to which they are shaped by experiential and contextual contingencies Our understandings of age are thereby boxed in and constricted by assumptions of normality and naturalness that limit our capacities to explore possible alternative experiences of development and aging and the conditions both individual and social that might foster such experiences Combining foundational principles of critical social science with recent breakthroughs in research across disciplines ranging from biology to economics this book offers a

scientifically and humanly expanded landscape for apprehending the life course Rejecting familiar but false dichotomies such as nature vs nurture and structure vs agency it clarifies the organismic fundamentals that make the actual content of experience so centrally important in age and development and it also explores why attention to these fundamentals has been so resisted in studies of individuals and individual change and in policy and practice as well In presenting the basic principles and reviewing the current state of knowledge Dale Dannefer introduces multi levelled social processes that shape human development and aging over the life course and age as a cultural phenomenon organizing his approach around three key frontiers of inquiry that each invite a vigorous exercise of sociological imagination the Social Structural Frontier the Biosocial Frontier and the Critical Reflexive Frontier
