Impact of risk-contingent credit and traditional credit on smallholders' agricultural investment and productivity: Experimental evidence from Kenya Ndegwa, Michael K., Shee, Apurba, Ward, Patrick S., Liu, Yanyan, Turvey, Calum G., You, Liangzhi, 2025-01-17 We use a multiyear multi arm randomized controlled trial implemented among 1 053 smallholders in Kenya to evaluate ex ante investment and ex post productivity and welfare benefits of two competing lending models risk contingent credit RCC which embeds crop insurance with a loan product and traditional credit TC We rely on local average treatment effects to demonstrate the effects of these alternative credit products on borrowers but report the intention to treat effects for their broader policy significance Uptake of RCC increased treated households farm investments specifically adoption of chemical fertilizers by up to 14 percent along the extensive margins and by more than 100 percent along the intensive margins while TC s effects were less in both magnitude and statistical significance Neither type of credit product had a significant effect on the overall area cultivated under maize hence enhancing agricultural intensification but not extensification Ex post neither type of credit product had a strong direct effect on households productivity We conclude that access to credit has potential to

increase investment and productivity among smallholders although improved productivity needs better measurement and extended intervention to be realized To scale the potential effects of credit derisking access to credit should be considered to expand access to credit *Lessons Learned and Not Yet Learned from a Multicountry Initiative on Women's Economic Empowerment* Sara Johansson de Silva,Pierella Paci,Josefina Posadas,2014-01-13 The Results Based Initiatives were a pioneering attempt to provide comprehensive coherent and rigorous evidence on effective interventions to foster the economic empowerment of women via five small pilots This study highlights lessons coming from the impact of the interventions and dos and don ts in the design and implementation of pilots **Causality in Policy Studies** Alessia Damonte,Fedra Negri,2023-02-13 This volume provides a methodological toolbox for conducting policy research Recognizing that policy research spans various academic disciplines each of which takes a different view on causality the volume introduces a methodologically pluralistic approach to policy studies Each chapter clarifies the research question that each technique can answer the research design and data treatment that each technique requires for its results to be sound the validity domain of its results and the actual deployment of the technique through a replicable example Techniques covered include quasi experimental designs approaches to account for selection bias and observed imbalances directed acyclic graphs and structural equation models Qualitative Comparative Analysis Bayesian case study and process tracing and Agent Based Modelling By working through the volume readers will understand how to learn from different techniques apply them consciously and triangulate them to make better sense of findings This volume is intended for advanced academic courses as well as scholars and practitioners in policy related fields such as political science economics sociology and public administration This is an open access book **Firm-Level Innovation In Africa** Abiodun Egbetokun,Richmond Atta-Ankomah,Oluseye Jegede,Edward Lorenz,2020-04-29 The literature on innovation in Africa is rapidly expanding and a recurring thread in the emergent literature is the pervasiveness of systemic weaknesses that inhibit the innovation process Despite these firms are able to innovate in Africa It is then logical to ask how do African firms manage to overcome the prevalent constraints and learn to innovate This book directly tackles this question with a view to improving our understanding of the innovation landscape in Africa The book brings together some of the latest innovation research from across the African continent ranging from Tanzania and Ethiopia in the east to Nigeria in the west The chapters included in the collection adopt different but complementary theoretical and methodological approaches to address a rich mix of interrelated issues These issues include the factors that enhance or inhibit innovation in African firms the sources of knowledge information for innovation policy options for overcoming constraints and facilitating firm level innovation the nature and roles of brokers and intermediaries in dealing with innovation constraints and in facilitating the innovation process and the role of interactive learning and acquisition of embodied technology in the innovation process This book was originally published as a special issue of Innovation and Development *Agricultural Economics* Ifeoluwapo Amao,Iyabo

Adeoye,2021-12-15 This book discusses pertinent aspects of agricultural economics and rural development It includes case studies that assess the impact of tomato cultivation on food security and poverty alleviation of rural dwellers and agricultural producers Additionally it examines farmers knowledge of organic livestock farming a novel method of livestock production The book also contains a review of factors affecting the efficiency of vegetable production and the basics of good agribusiness plans for successful agribusiness activities Impact Evaluation in Practice;La Evaluación de Impacto en la Práctica Paul J. Gertler,Sebastian Martinez,Patrick Premand,Laura B. Rawlings,Christel M. J. Vermeersch,2011-06-13 This book offers an accessible introduction to the topic of impact evaluation and its practice in development While the book is geared principally towards development practitioners and policymakers designing prospective impact evaluations we trust that it will be a valuable resource for students and others interested in using impact evaluation Prospective impact evaluations should be used selectively to assess whether or not a program has achieved its intended results or to test alternatives for achieving those results We consider that more and better impact evaluation will help strengthen the evidence base for development policies and programs around the world If governments and development practitioners can make policy decisions based on evidence including evidence generated through impact evaluation our hope is that development resources will be spent more effectively and ultimately have a greater impact on reducing poverty and improving people s lives The three chapters in this handbook provide a non technical introduction to impact evaluations including Why Evaluate in Chapter 1 How to Evaluate in Chapter 2 and How to Implement Impact Evaluations in Chapter 3 These elements are the basic tools needed in order to successfully carry out an impact evaluation From a methodological standpoint our approach to impact evaluation is largely pragmatic we think that the most appropriate methods should be identified to fit the operational context and not the other way around This is best achieved at the outset of the program through the design of prospective impact evaluation that can be built into the project s implementation We argue that gaining consensus between key stakeholders and identifying an evaluation design that fits the political and operational context is as important as the method itself We also believe strongly that impact evaluations should be upfront about their limitations and caveats Finally we strongly encourage policymakers and program managers to consider impact evaluations in a logical framework that clearly sets out the causal pathways by which the program works to produce outputs and influence final outcomes and to combine impact evaluations with monitoring and selected complementary evaluation approach to gain a full picture of performance This book builds on a core set of teaching materials developed for the Turning Promises to Evidence workshops organized by the office of the Chief Economist for Human Development HDNCE in partnership with regional units and the Development Economics Research Group DECRG at the World Bank Enhancing Agricultural Productivity and Farmer Incomes in Bihar Bhaumik, Sankar Kumar,2022-11-28 Enhancing Agricultural Productivity and Farmer Incomes in Bihar discusses the performance of Bihar s agriculture sector in recent times and the multifarious challenges it is facing The book explores

future possibilities from the perspectives of raising agricultural productivity and farmer incomes and attaining inclusive growth. Given that doubling farmers' incomes in India is the declared agenda of the central and state governments, the insights to be gained from this book would be invaluable for researchers and policymakers. With more than 90 per cent of the operational holdings in Bihar falling under the marginal category and the average size of a holding being a meagre 0.39 hectares, the viability of the small farming regime in the state is a serious issue. This book will help readers to understand the developmental challenges not only in Bihar but also in other agriculturally backward regions that are largely dominated by small farmers. It will also help researchers to locate areas in which more research needs to be undertaken if accelerated growth of the agriculture sector and sustainable improvement of farmers' incomes are to be ensured.

Social Policy in Post-Apartheid South Africa Ndangwa Noyoo, 2019-11-01. This book critically examines the current social policy in post-apartheid South Africa and proposes an alternative social policy agenda to create a new development pathway for the country. Taking social policy as a vehicle that will facilitate the creation of a new society altogether, namely the Good Society, the author argues for the adoption of policy that will socially re-engineer South Africa. The author shows how the policy tools and development interventions which were undertaken by the post-apartheid state in driving South Africa's transformation agenda failed to emancipate many individuals, families, and communities from the cycle of intergenerational poverty and underdevelopment. He contends that social policy interventions that foster the social re-engineering of South African society must take place to untangle the inherited colonial apartheid social order. This book includes comparative analyses on the Global South and Global North to present the ways in which countries such as post-Second World War Great Britain and Sweden and post-independence Zambia of the 1960s and 1970s were able to use social policy to create new societies altogether or places similar to the Good Society. The conceptual and methodological issues that form the basis for this book reside in public policy making and the public good and will be of interest to scholars of social policy, social development, and South African society.

The Impact of Corporate Social Responsibility Robert Kudlak, Ralf Barkemeyer, Lutz Preuss, Anna Heikkinen, 2022-08-26. The Impact of Corporate Social Responsibility: Corporate Activities, the Environment, and Society adds to the current debate on the societal level impacts of corporate social responsibility (CSR). This edited volume offers conceptual and empirical contributions highlighting various dimensions of CSR impacts. What differentiates the book from others is that we examine the impact of CSR at the societal level rather than focussing only on those that occur at the level of the firm. The book's contributions present novel perspectives that comprise, among others, empirical analyses of CSR activities, accounts of impacts in various geographic locations, and state-of-the-art reviews of extant literature on the topic. The practical examples and theory building presented here help us to better capture the societal impacts of contemporary CSR practice. This book will appeal to scholars and students as well as practitioners and policy makers interested in practical and theoretical aspects of CSR impacts at the societal level. Global Forest Carbon Runsheng Yin, 2024-03-15 This book addresses the major policy economic and financial issues encountered in global forest carbon. The global forest sector is expected to play a major role in achieving the Paris Agreement's temperature targets. Therefore, there is an urgent need to explore practical and promising solutions to the challenges facing carbon accounting and policy assessment as the global community undertakes forest sector actions including the widely known REDD initiative. This book demonstrates how vital it is that we identify appropriate perspectives and formulate approaches to address these challenges in an integrated and effective manner. In doing so, it addresses many of the major issues including the differential potentials for carbon sequestration within various forest ecosystems as well as for storage within a variety of harvested wood products, the joint production of timber and carbon, and the measurement and impact of forest carbon offsets and credits, results-based payments and other nationally determined contributions, centered differences as well. The book examines regional and country-level case studies from across the world and draws on the author's decades of experience working on forest policy and with the forest sector. Overall, this book highlights the technical and policy issues regarding forest sector carbon emission and removal to build useful perspectives, frameworks and methods for addressing these issues successfully in the future. It advances the knowledge frontiers of global forest carbon policy, economics and finance as well as the ability to assess the effectiveness, efficiency and equity of forest climate solutions. This book is essential reading for professionals and policymakers working at the intersection of forest policy, carbon storage and climate change as well as students and researchers in the fields of forestry, natural resource management, climate change and nature-based solutions.

Emerging Technologies Sinan Küfeoğlu, 2022-07-11 This monograph investigates a multitude of emerging technologies including 3D printing, 5G, blockchain and many more to assess their potential for use to further humanity's shared goal of sustainable development. Through case studies detailing how these technologies are already being used at companies worldwide, author Sinan Küfeoğlu explores how emerging technologies can be used to enhance progress toward each of the seventeen United Nations Sustainable Development Goals and to guarantee economic growth even in the face of challenges such as climate change. To assemble this book, the author explored the business models of 650 companies in order to demonstrate how innovations can be converted into value to support sustainable development. To ensure practical application, only technologies currently on the market and in use at actual companies were investigated. This volume will be of great use to academics, policymakers, innovators at the forefront of green business and anyone else who is interested in novel and innovative business models and how they could help to achieve the Sustainable Development Goals.
