

Switching off the electricity

- Turn off the water tap after every wash. This will limit the wear of your appliances water system and also prevent leaks.
- Unplug your appliance when cleaning it and during all maintenance operations.

Cleaning

Cleaning the exterior

Use a damp cloth or silicon polish to clean the exterior surfaces of the appliance.

Cleaning the dispenser drawer and compartments

It is advisable to clean the dispenser drawer regularly.
! Do not try to clean any part of the dispenser drawer while the machine is running.

1. Pull out the drawer until it reaches its stop.

2. Press the drawer release button to remove the dispenser drawer (see pic).

3. Clean and dry the dispenser drawer, syphons, grate and fabric conditioner exit channel (A). Also regularly clean the outlet pipe area (B).

4. Relocate the dispenser drawer and push it firmly back into place.

! Do not clean any part of the machine with abrasive cleaners, scouring agents, acids, any bleach or metal polish as they may cause damage.

! We recommend a maintenance wash 2 or 3 times a year, to avoid a build up of greasy deposits and water hardness residue. Run Programme B, without laundry and without detergent.

- Where the drying only option is regularly used, do this on a monthly basis.

Cleaning the door bowl

Clean the internal surface of the door bowl regularly with a soft cloth. A build up of soap powder and water hardness residue may result in water leaking from the door.

- Always leave the appliance door ajar to prevent unpleasant odours from forming.

Checking the water inlet hoses

Check the water fill hoses at least once a year. If you see any cracks, replace them immediately: during the wash cycles, high water pressure could cause a cracked hose to split open.

! Never use hoses that have already been used.

Moulded plug

! The plug must not be used without the fuse cover in place. If a replacement fuse holder/cover is required, it must be of the same colour coding or wording as shown on the base of the plug. Replacements are available from authorised dealers.

Changing the plug

The wires in the power cord are coloured in accordance with the following:

Green and yellow (Earth) wire to terminal marked 'E', symbol , or coloured green and yellow.

Blue (Neutral) wire to terminal marked 'N' or coloured black.

Cord clamp

13A, ASTA approved fuse to BS 1362.

Brown (Live) wire to terminal marked 'L' or coloured red.

! If the plug being replaced is a non-rewirable type, then the cut-off plug must be disposed of safely. DO NOT leave it where it can be inserted into a socket and create a shock hazard.

! The power supply cord should be checked periodically and replaced by a cord specially prepared for this machine and fitted only by authorised technicians (see Service). New or longer power cords are supplied at an extra charge by authorised dealers.

! The manufacturer denies any responsibility should any of these rules not be followed.

! If in doubt about any of the above consult a qualified electrician.
