Consider two events (t, x, y, z) and $(t' + dt', x' + dx', y' + dy', z' + dz')$ in the space-time coordinate system S . Let the space-time interval between the two events (ds) which is the distance between

$$(ds)^2 = dx^2 + dy^2 + dz^2 + (icdt)^2$$

$$(ds)^2 = dx^2 + dy^2 + dz^2 - c^2 dt^2$$

$$(ds')^2 = dx'^2 + dy'^2 + dz'^2 - c^2 dt'^2$$

How Relative Is Relativity:

Absolute or relative motion ? : a study from a Machian point of view of the discovery and the structure of dynamical theories Julian B. Barbour,1988 **Forty Types of PROOFS of Actual Totality** Marcus Bergh,2014-05-07 The one world problem has been central to knowledge for ages Of many approaches none has resolved the problem With great increases in knowledge there is now sufficient ideas concepts and means to show a unified ultimate totality Actual Totality is a book whose proofs and detail provide the needed resolution The approach to unity is by forty types of proof from non existence to their combined sum It features those universals qualities continua kinds and varieties of actual totality whose proofs are most certain Certainty of proofs produces axioms that are most recognizable as laws Each type of proof has different laws whose integration and representation give excellent proof of actual totality Dependence on the observer observed relationship is the basis for relativity Dependence on the definite absolute quality of the human mind and person is the basis for the absoluteness seen in identity and self preservation Mind and matter are part of a continuum that is the basis and proof of actual totality Many other continuums make up actual totality including general and special mass energy length time static and dynamic The continua are dualities whose spectra form gradients It is these gradients that make up much of the detail and differential whose vertical integration proves actual totality The physical universe and the relative universe of civilization best human life and mind are large components of the general to special spectrum and varieties of actual totality There is massive interaction and potential to actual existence in and out of actual totality This occurs with increasing time In the near to mid term actual totality is stable and can be treated as a closed set In the far term both the actual and potential of actual totality undergo adaptation and alteration that best suits their existence with change With good representation an overview of the difference between actual totality as a stable and relatively exclusive world and potential changes in the long term become clear The many revolutions that accompany change and the role of language math proportions geometry design propelling and compelling forces that determine creation and evolution of life all reveal proofs of actual totality The core of actual totality or actual totality proper is centered on the here and now that proves unity in totality The individual groups and lives of all people more or less contribute to the whole depending on productivity that is most beneficial to the whole This is largely dependent on knowledge and its kinds Universal knowledge of the highest kind is the great dynamo of advancing actual totality How well actual totality supplies this need is the most important problem and solution of the next hundreds to thousands of years It is survival over extinction whose success will depend largely on proactive planning prevention preparation management and control They can be used to guide each and all persons to a better unified world by actual totality *Ancient Relativity* Matthew Duncombe,2020-02-13 Ideas about relativity underlie much ancient Greek philosophy from Protagorean relativism to Plato s theory of Forms Aristotle s category scheme and relational logic In *Ancient Relativity* Matthew Duncombe explores how ancient philosophers particularly Plato Aristotle the Stoics and Sextus Empiricus

understood the phenomenon and how their theories of relativity affected and were affected by their broader philosophical outlooks He argues that ancient philosophers shared a close knit family of views referred to as constitutive relativity whereby a relative is not simply linked by a relation but is constituted by it Plato exploits this view in some key arguments concerning the Forms and the partition of the soul Aristotle adopts the constitutive view in his discussions of relativity in Categories 7 and the Topics and retains it in Metaphysics Delta 15 Duncombe goes on to examine the role relativity plays in Stoic philosophy especially Stoic physics and metaphysics and the way Sextus Empiricus thinks about relativity which does not appeal to the nature of relatives but rather to how we conceive of things as correlative

The Science of Intelligent

Achievement Isaiah Hankel, 2018-02-05 Smart strategies for pragmatic science based growth and sustainable achievement The Science of Intelligent Achievement teaches you the scientific process of finding success through your most valuable assets Selective focus how selective are you with who and what you let into your life Creative ownership how dependent are you on others for your happiness and success Pragmatic growth how consistently and practically are you growing daily First this book will show you how to develop your focus by being very selective with where you spend your mental energy If you've failed to reach an important goal because you were distracted misinformed or overcommitted then you know the role focus and selectivity play in achievement Second you will learn how to stop allowing your happiness and success to be dependent on other people and instead start taking ownership over your life through creative work Finally you will learn the art of changing your life through pragmatic decisions and actions Self improvement is not the result of dramatic changes Instead science has shown that personal and professional change is initiated and sustained by consistent practical changes To grow you must leverage the power of micro decisions personal responsibility and mini habits Your own biology will not let you improve your life in any other way What do you currently value What are working to attain Have you been taught to value your job title or your relationship with some other person above all else Have you been convinced that the most valuable things in life are your paycheck the number of people who say hello to you at the office and the number of people who say I need you at home Or have you become so passive in what you value that you let anyone and anything into your life as long as whatever you let in allows you to stay disconnected from the cold hard truth that when things really go wrong in your life the only person who will be able to fix it and the only person who will be responsible for it is you If so welcome to fake success Passivity dependence and the sacrifice of practical thinking and personal responsibility to fuzzy grandiose ideals and temporary feelings these are markers of fake success Intelligent Achievement on the other hand is not a moving target It's not empty either Instead it's sturdy full and immovable It's not something that's just handed to you It's not something you're nudged to chase or coerced into wanting Intelligent Achievement comes from within you It's a collection of values that are aligned with who you are values you have to protect and nurture These values do not increase your dependence on other people and things Instead they relieve you of dependence This kind of achievement is something that you have a part in building from the ground up you know what's in it you chose it someone else didn't choose it for you Achieving real success means you must focus create and grow daily The Science of Intelligent Achievement will show you how 19th Natural Philosophy Alliance Proceedings Greg Volk, 2012-07-14 The Natural Philosophy Alliance NPA sponsors regular international conferences for presenting high quality papers discussing aspects of philosophy in the sciences Many papers offer challenges to accepted orthodoxy in the sciences especially in physics Everything from the micro physics of quantum mechanics to the macro physics of cosmology is entertained Though the main interest of the NPA is in challenging orthodoxy in the sciences it will also feature papers defending such orthodoxy Our ultimate purpose is to enable participants to articulate their own
