Ross, 2011-01-19 Preface The laboratory gives you the opportunity to get your hands on biology You go beyond reading and study and actually enter into the process of doing science The benefit you derive from the laboratory is directly dependent on two things first the care with which you perform the experiments and record your observations and second your awareness of the relationship between your observations and the general principles under study Because of time limitations we cannot investigate in the slow methodical often tedious way scientist do However you will have the opportunity to measure experiment observe and discover for yourself In general each laboratory exercise consists of the following Safety box alerts you to any hazardous materials Objectives explicitly state what you can expect to accomplish Introduction consist of background information to orient you to the biological concept being explored Preview is a general overview of what you will be doing Procedure provides step by step instruction to guide you through the laboratory exercise End of exercise questions helps you focus on the important observations and concepts relevant to the day s investigation      **Concepts of Biology Laboratory Manual** Boise State University (Biology), 2008-04-08      *Laboratory Manual* Eldon D.
