

Hotel Property Management System

A hotel property management system (PMS) is a 'a set of application programs that directly relate to hotel front office and back office activities e.g. revenue management, reservation management, room and rate assignment, check-in & out management, guest accounting, folio management, account settlement and room status management' (Kasavana and Cahill, 2003, p. 4).

The availability and accessibility of data are vital to those in the hospitality industry. The hospitality industry requires a large volume of data to run day-to-day business operations and to achieve excellent service delivery. Unlike other industries, hospitality is a service-based industry that relies upon an ability to form relations with a customer base (Kokaz Pucciani and Murphy, 2011). As a result, the industry is reliant upon information about consumers and their preferences. These preferences may range from preferred room type to information about personal needs. The hospitality industry
