Spoiling Childhood Diane Ehrensaft,1999-04-01 This book vividly encapsulates the absurdities heartbreaks and possibilities of contemporary child rearing The book shows how parents today are all too often caught up in a guilt driven pendulum swing between parenting too little and parenting too much Dr Ehrensaft suggests innovative ways to overcome the treacherous balancing acts of work and family demands She invites us to replace perfect parenting with good enough trade harriedness for harmony and give our children a healthier environment in which to grow *Young Children and Families in the Information Age* Kelly L. Heider,Mary Renck Jalongo,2014-12-05 This edited book presents the most recent theory research and practice on information and technology literacy as it relates to the education of young children Because computers have made it so easy to disseminate information the amount of available information has grown at an exponential

rate making it impossible for educators to prepare students for the future without teaching them how to be effective information managers and technology users Although much has been written about information literacy and technology literacy in secondary education there is very little published research about these literacies in early childhood education Recently the National Association for the Education of Young Children and the Fred Rogers Center for Early Learning and Children's Media at Saint Vincent College published a position statement on using technology and interactive media as tools in early childhood programs This statement recommends more research to better understand how young children use and learn with technology and interactive media and also to better understand any short and long term effects Many assume that today's young children are digital natives with a great understanding of technology However children may know how to operate digital technology but be unaware of its dangers or its value to extend their abilities This book argues that information and technology literacy include more than just familiarity with the digital environment They include using technology safely and ethically to demonstrate creativity and innovation to communicate and collaborate to conduct research and use information and to think critically solve problems and make decisions
