Agencies,2014    Advances in Quantitative Remote Sensing in China – In Memory of Prof. Xiaowen Li Shunlin

Liang,Guangjian Yan,Jiancheng Shi,2019-03-07 Quantitative land remote sensing has recently advanced dramatically particularly in China It has been largely driven by vast governmental investment the availability of a huge amount of Chinese satellite data geospatial information requirements for addressing pressing environmental issues and other societal benefits

Many individuals have also fostered and made great contributions to its development and Prof Xiaowen Li was one of these leading figures This book is published in memory of Prof Li The papers collected in this book cover topics from surface reflectance simulation inversion algorithm and estimation of variables to applications in optical thermal Lidar and microwave remote sensing The wide range of variables include directional reflectance chlorophyll fluorescence aerosol optical depth incident solar radiation albedo surface temperature upward longwave radiation leaf area index fractional vegetation cover forest biomass precipitation evapotranspiration freeze thaw snow cover vegetation productivity phenology and biodiversity indicators They clearly reflect the current level of research in this area This book constitutes an excellent reference suitable for upper level undergraduate students graduate students and professionals in remote sensing    **Thermal Infrared**

**Remote Sensing** Ruiliang Pu,Qiuyan Yu,2025-08-15 This book systematically and comprehensively introduces concepts

theories principles and applications of Thermal Infrared TIR imaging spectral techniques and TIR remote sensing It introduces in detail algorithms techniques and methods for processing and analyzing TIR data including radiometric calibration and atmospheric correction in TIR region retrieving land surface emissivity and temperature LST from various TIR data and downscaling LST and TIR radiance spatiotemporally Focusing on TIR RS application orientation this book introduces state of the art techniques and methods applied in areas such as hydrology biomass burning urban thermal environment and other areas of interest Features Presents a complete coverage of thermal infrared remote sensing from concepts to applications Provides a thorough survey of characteristics and types of airborne and spaceborne TIR sensors systems and missions Discusses principles and methods of radiometric calibration and atmospheric correction for correcting TIR data Includes case studies that demonstrate the applicability and potential of a variety of techniques and methods to process TIR data Offers a comprehensive review of TIR remote sensing applications This book is a great resource for professionals in the academic and corporate world and an insightful reference for graduate and senior undergraduate

students studying geology geography geophysics and environments as well as natural resources and survey management

**Communications, Signal Processing, and Systems** Qilian Liang,Xin Liu,Zhenyu Na,Wei Wang,Jiasong Mu,Baoju Zhang,2019-06-14 This book brings together papers from the 2018 International Conference on Communications Signal Processing and Systems which was held in Dalian China on July 14 16 2018 Presenting the latest developments and discussing the interactions and links between these multidisciplinary fields the book spans topics ranging from communications signal processing and systems It is aimed at undergraduate and graduate electrical engineering computer science and mathematics students researchers and engineers from academia and industry as well as government employees

**Remote Sensing Applications in Monitoring of Protected Areas** Yeqiao Wang ,Zhong Lu,Yongwei Sheng,Yuyu Zhou,2020-12-02 Remote sensing has been successfully applied in monitoring of protected areas around the world With intensified impacts of climate and environmental change protected areas become increasingly important to serve as indicators of and buffers against the impacts of the disturbances Remote sensing plays an irreplaceable role in this frontline of challenges The subjects and contents of the articles collected in this book reflect the state of the art applications of remote sensing for capturing dynamics of environmental and ecological variations of the protected areas The examples include revealing the level growth rate trend and distribution pattern of the night time light of global protected areas quantifying the energy budget water cycle and carbon sink over the Three River Headwaters Region in the hinterland of the Tibetan Plateau monitoring wetland change in a cross boundary zone between Northeast China and the Russian Far East and monitoring applications and change analyses in protected areas of boreal forests dryland shrubs coastal salt marshes large lakes and temperate semi humid to semi arid transitional agricultural regions using a variety of sensor data with innovative approaches Also included in this collection is a bibliometric analysis that suggests the intellectual structure in remote sensing of protected areas from the perspective of journal publications

[Remote Sensing for Target Object Detection and Identification](#) Gemine Vivone,Paolo Addesso,Amanda Ziemann,2020-03-06 Target object detection and identification are among the primary uses for a remote sensing system This is crucial in several fields including environmental and urban monitoring hazard and disaster management and defense and military In recent years these analyses have used the tremendous amount of data acquired by sensors mounted on satellite airborne and unmanned aerial vehicle UAV platforms This book promotes papers exploiting different remote sensing data for target object detection and identification such as synthetic aperture radar SAR imaging and multispectral and hyperspectral imaging Several cutting edge contributions which provide examples of how to select of a technology or another depending on the specific application will be detailed
