Wireless is the first edited collection on wireless and mobile technologies in the field of rhetoric and composition. The contributors offer rhetoric and composition teachers, scholars, and administrators a range of practical and theoretical insights on wireless and mobile technologies. This collection serves as a resource for theoretical explorations on wireless and mobile technology use as it relates to computer and composition teaching and research and acts as a reference for those in the rhetoric and composition community charged with the responsibilities of integrating, supervising, and evaluating wireless and mobile technologies. *Going Wireless* is organized into five major sections and an appendix of key mobile and wireless technology terms. In each section, authors represent a range of perspectives as they articulate the roles of students, teachers, administrators, and researchers working with and through mobile and wireless devices. The book provides readers with ways to understand the influence of wireless and mobile technologies by critiquing the corporate and IT perspectives that inform mobile and wireless development and integration and seeking out new tropes for learning, teaching, and researching. Drawing on interviews and surveys, rhetorical analyses, and theoretical explorations of wireless and mobile devices, the authors enact a range of methodologies to make claims for reflective approaches to research and teaching with wireless and mobile devices. The contributors share their perspectives on the impact of these technological shifts and situate their experiences in relationship to rhetoric and composition as a field.

Stephan, 2011 For more than a century from 1900 to 2006 campaigns of nonviolent resistance were more than twice as effective as their violent counterparts in achieving their stated goals By attracting impressive support from citizens whose activism takes the form of protests boycotts civil disobedience and other forms of nonviolent noncooperation these efforts help separate regimes from their main sources of power and produce remarkable results even in Iran Burma the Philippines and the Palestinian Territories Combining statistical analysis with case studies of specific countries and territories Erica Chenoweth and Maria J Stephan detail the factors enabling such campaigns to succeed and sometimes causing them to fail They find that nonviolent resistance presents fewer obstacles to moral and physical involvement and commitment and that higher levels of participation contribute to enhanced resilience greater opportunities for tactical innovation and civic disruption and therefore less incentive for a regime to maintain its status quo and shifts in loyalty among opponents erstwhile supporters

including members of the military establishment Chenoweth and Stephan conclude that successful nonviolent resistance ushers in more durable and internally peaceful democracies which are less likely to regress into civil war Presenting a rich evidentiary argument they originally and systematically compare violent and nonviolent outcomes in different historical periods and geographical contexts debunking the myth that violence occurs because of structural and environmental factors and that it is necessary to achieve certain political goals Instead the authors discover violent insurgency is rarely justifiable on strategic grounds
