distinction between the producer's perspective and the consumer's perspective Theories that afford us a critical appreciation of a creative work do not similarly afford an explanatory insight into the origins and development of the work As researchers we must approach creativity both as producers to consider the vast search spaces that a producer encounters and to appreciate the need for heuristic strategies for negotiating this space and as consumers to appreciate the levels of shared knowledge foreground and background that is exploited by the producer to achieve a knowingly creative effect in the mind of the consumer This volume thus brings together both producers and consumers in a cross disciplinary exploration of this complex many faceted phenomenon      **Energy Research Abstracts** ,1992-02      Charting the Unknown Nicholas R.
