

The purpose of this document is to provide a comprehensive overview of the project's objectives, scope, and deliverables. It serves as a reference for all stakeholders involved in the project, ensuring that everyone is aligned on the goals and expectations.

2. Project Objectives

2.1. Goals

2.1.1. Goal 1

The first goal of the project is to develop a robust and scalable system architecture that can handle the expected load and ensure high availability. This involves selecting the appropriate technologies, designing the database schema, and implementing the necessary security measures.

3. Project Scope

The project scope is defined by the specific features and functionalities that will be developed. It includes the initial requirements gathering phase, where the needs of the stakeholders are identified and documented.

The project will also cover the testing and deployment phases, ensuring that the final product meets the quality standards and is ready for production use.

The system architecture is designed to be modular and scalable, allowing for future growth and the addition of new features without significant rework.

The architecture is based on the following principles:

- Modularity: The system is composed of independent modules that can be developed and tested separately.
- Scalability: The system is designed to handle increasing loads by adding more resources.
- Security: The system implements robust security measures to protect data and ensure privacy.

Component	Technology	Version
Client	Web Browser	Chrome 90
API	REST API	1.0.0
Application	Python	3.9.0
Database	MySQL	8.0.25

The system architecture is documented in the following sections:

- System Requirements
- Architecture Design
- Implementation Details

3. Project Management

The project management process includes the following steps:

- Project Initiation
- Project Planning
- Project Execution
- Project Monitoring and Control
- Project Closure

The project manager is responsible for ensuring that the project is completed on time, within budget, and to the satisfaction of the stakeholders.

The project team consists of the following members:

- Project Manager
- System Architect
- Developer
- Tester
- Deployment Specialist

The project is currently in the execution phase, and the team is working to complete the remaining tasks.
