Land, Law and Chiefs in Rural South Africa William Beinart, Rosalie Kingwill, Gavin Capps, 2021-05-01 This edited collection illustrates contestations over land and political authority in South Africa's rural areas focusing on threats to popular rights and how they are being supported Who controls the land and minerals in the former Bantustans of South Africa chiefs the state or landholders Disputes are taking place around the ownership of resources decisions about their exploitation and who should benefit With respect to all of these issues the courts have become increasingly important The contributors to Land Law and Chiefs in Rural South Africa capture some of these intense contestations over land law and political authority focussing on threats to the rights of ordinary people History and customary law feature strongly in most disputes and succession to chieftaincy is also frequently disputed Judges have to make decisions in a context where rival claimants to property or office assert their own versions of history and custom The South African constitution recognizes customary law and the courts are attempting to incorporate and develop this branch of jurisprudence as living customary law Lawyers community leaders and academics are called on to assist in researching cases around restitution land rights and customary law The chapters in this collection discuss legal cases and policy directions that have evolved since 1994 Some chapters analyze the increasing power of chiefs in the South African rural areas while others suggest that the courts are giving support to popular rights over land and supporting local democratic processes Contributors record significant pushback from groups that reject traditional authority These political tensions are a central theme of the collection and thus serve as vital case studies in furthering our understanding of rights and restitution in South Africa Land Law Ben McFarlane, Nicholas Hopkins, Sarah Nield, 2020 Authoritative analytical and concise McFarlane Hopkins and Nield's Land Law provides succinct coverage on the core areas without sacrificing depth or detail The authors unique approach to land law arms students with the tools to apply an independent critical thought process to the content covered in classes and assessments **The Principles of Land Law** Emma Lees, 2020 The core principles of land law are articulated clearly in this

Land Law Rebecca Kelly, Emma Hatfield, 2017-07-14 Problem Based Learning is a way of learning that presents a practical problem scenario in the context of which learning is conducted Normally students are taught law through the transmission of information about legal principles and not presented with problems until they have accumulated enough information to solve them In PBL discussion and analysis of the problem starts the process of learning rather than acting as an end point As a curriculum concept it is becoming increasingly common in law schools as the use of problem scenarios helps to trigger awareness of legal issues and to engage interest by highlighting the real world ramifications This new textbook creates a fresh approach to learning land law through the use of scenarios found in real life which bring what is often perceived to be a dry and difficult subject to life This helps both to engage the student and make the subject more accessible as well as demonstrating to students how land law actually operates in the real world Land Law is often seen as an esoteric subject with lots of technicalities and complex vocabulary and students often forget the context in which it operates With Land Law A Problem Based Approach context is placed at the heart of learning Students are learning through application rather than via an abstract set of rules and can therefore gain a deeper understanding of how land law works not just what it is Unlike other textbooks Land Law A Problem Based Approach integrates a thorough exposition of the law with practice facilitating a more active learning approach and helping students to engage directly with the key cases and statutes to develop key skills of analysis problem solving and application Written in a clear and concise style but without sacrificing detail or analysis the book guides the reader towards a deeper understanding of the land law curriculum Key features include An introductory chapter outlining the problem based learning approach and how to use the book Content overviews at the start of each chapter which provide a useful outline of the chapter s content and the key principles PBL scenarios at the start of each chapter which provide the real life context to each topic and help to familiarise readers with the

legal language and style they will encounter Together with the relevant supporting documents these scenarios are referenced and integrated throughout the chapter let s put this into context boxes which require students to apply the law that they have learnt back to the problem scenario and offer opportunities to reflect and consolidate on the content covered Essential Cases and Essential Statutes boxes reinforce the essential role of cases and legislation in the development and application of land law and help students identify key cases and legislation for revision purposes Understanding Terminology boxes and an online glossary help students to get to grips with the technical terms and vocabulary unique to land law Tables and diagrams explain difficult concepts and rules ideal for visual learners Tips and notes highlight key issues and make links between different aspects of the law without interrupting the flow of the text Specimen exam style questions are ideal for revision and help to provide opportunities to apply learning and practice exam technique
