Notes:

Known Sphere Of Operation: Federation Border

Date Reliability: D

Major Data Source:

Klingon Sector Intelligence, Operation Dixie

The L-24 is the largest warship in the Klingon navy. These mammoth ships were commissioned into service prior to the testing of the Federation battleship *Excelsior*. For a short period of time, the balance of power along the borders turned in favor of the Klingons.

The battleship uses the most powerful warp and impulse engines in the Klingon inventory. The combination of these power plants gives these vessels a highly efficient maneuver ratio and allows them to sustain speeds of Warp 6 for long periods of time. The warp engines are mounted on pylons to keep them from the main hull of the ship, and, as with most newer designs, they can be jettisoned in case of emergency. The L-24 differs from other Klingon ships regarding the shielding provided to the engineering technicians. Most other Klingon vessels have minimal engine shielding, and service races are trained to operate this equipment; in the L-24, Klingon citizens operate the engines.

The L-24 mounts eight KD-8 disruptors in banks of two, and four KD-13 disruptors. The KD-8s are mounted two banks on the command pod and two banks on the main hull. The KD-13s are mounted on the rear of the main hull. The battleship can fire as many as ten disruptors and two photon torpedoes in some areas of the forward arc, giving this ship a definite advantage in most situations. The KP-6 torpedo, which is mounted in both the fore and aft positions, can inflict as much damage as the most powerful torpedo in the Federation arsenal.

The interior of the battleship is compartmented to reduce the dangers of decompression during battle. This makes the structural integrity of the ship much greater, as seen by the high superstructure strength rating. The deflector shielding for the L-24 is the best the Klingons can produce at this time.

The bridge is located in the forward pod. This typical Klingon bridge design is capable of being separated from the main hull in case of emergency. The bridge of the L-24 has an auxiliary impulse engine that can be used only after separation; it gives the command pod the ability to travel short distances and allows a minimum of maneuvering. The pod mounts two of the KD-8 disruptor banks, which are capable of firing in all directions when separated from the main hull. Also mounted in the pod is a torpedo bay capable of firing torpedoes, though the torpedo storage is minimal.

Like most Klingon warships, this vessel carries assault troops. The 490 troops and their eight light support vehicles are capable of being transported to the ground in less than seven minutes.

As of Stardate 2/2306, only two L-24s have been commissioned into service. Both vessels have been scanned along the Federation border and are known to be working that area. Intelligence gathered from Operation Dixie suggests that new L-24s will be stationed along the Romulan and Triangle borders in the near future.

Further data gained by Operation Dixie shows that these battleships will be produced at two facilities. The first models have been manufactured at the Tasmur shipyard, and it is believed that the second facility is being constructed at Gnuw Ra'.

The class is named from the Klingon *komo va'*, which translates to *always in victory*.
