Knowledge Intensive Business Services Marcela Miozzo, Damian Grimshaw, 2006-01-01 The book provides convincing findings against the hypothesis of KIBS as a factor of cognitive convergence or loss of diversity within our economies On the contrary KIBS are active agents of divergence and there is no universal pattern of the nature and the evolution of KIBS but national varieties It also shows that in order to well understand the inter organizational collaboration between KIBS and their clients and more generally KIBS dynamics and their performance transaction cost economies and agent theory should be complemented by other perspectives such as knowledge based approaches network theories modularity theories etc This book which is strongly oriented towards both policy and theoretical questions is a valuable addition to a body of literature which is still too scarce No doubt that it will stimulate further research in this field It is undoubtedly a high level knowledge intensive service provision about knowledge intensive business services Fa z Gallouj University of Lille France This book focuses on the development of Knowledge Intensive Business Services KIBS and the associated market characteristics and organisational forms It brings together reputed scholars from a mix of disciplines to explore the nature and evolution of a range of Knowledge Intensive Business Services Through an examination of KIBS sectors such as computer services management consultancy and R D services the contributions in this book argue that the evolution of KIBS is strongly associated with new inter organizational forms and that different country institutions shape the characteristics of these organisational forms The book provides a strong contribution to theory and empirical evidence on fast growing KIBS and their implications for innovation The book will be of interest to final year undergraduates and postgraduate students and scholars in the field of innovation studies organisation studies and comparative business systems across Europe
