Handbook on Policy, Process and Governing H.K. Colebatch, 2018-12-28 This Handbook covers the accounts by practitioners and observers of the ways in which policy is formed around problems how these problems are recognized and understood and how diverse participants come to be involved in addressing them H K Colebatch and Robert Hoppe draw together a range of original contributions from experts in the field to illuminate the ways in which policies are formed and how they shape the process of governing

An Intellectual History of School Leadership Practice and Research Helen M. Gunter, 2016-01-28 *An Intellectual History of School Leadership Practice and Research* presents a detailed and critical account of the ideas that underpin the practice of educational leadership through drawing on over 20 years of research into those who generate popularise and use those ideas It moves from abstracted accounts of knowledge claims based on studying field outputs towards the biographies and practices of those actively involved in the production and use of field knowledge The book presents a critical account of the ideas underpinning educational leadership and engages with those ideas by examining the origins development and use of conceptual frameworks and models of best practice It deploys an original approach to the design and composition of an

intellectual history and as such it speaks to a wider audience of scholars who are interested in developing and deploying such approaches in their particular fields **Knowing Governance** Jan-Peter Voß, Richard Freeman, 2016-01-26 Knowing

Governance sets out to understand governance through the design and making of its models and instruments What kinds of knowledge do they require and reproduce How are new understandings of governance produced in practice by scientists and policy makers and by the publics with whom they engage *The Posthumanist Epistemology of Practice Theory* Michela

Cozza, Silvia Gherardi, 2023-12-15 Within and beyond organization studies an epistemology of practice allows us to view the ongoing interaction between doing and knowing the knowing subject and the known object social and material humans nonhumans more than humans This book is a collection of reflections by scholars across the social sciences around epistemological practices and the epistemology of posthumanist practice theory Practice theories and practice based studies have developed a rich methodology for studying working practices This book is an epistemological reflection that challenges the distinction between theory and method questions the knowing practices that give form to the object of knowledge how they draw boundaries between what comes to matter and what is excluded from mattering It will be of great interest to scholars and students of organization studies and beyond allowing social science researchers to rethink their positioning within their own research practices and leaving them open to a broader looser and more generous understanding of qualitative methodologies Chapters 1 2 5 and 6 are available open access under a Creative Commons Attribution 4 0

School Inspectors Jacqueline Baxter, 2017-04-10 This book examines the role of the inspector within the context of a number of OECD member states and explores the ways in which the inspectors themselves interpret implement and influence inspection practices and policy Inspection policy can have various unintended consequences some of which produce radical discrepancies between the policy intent and its implementation A number of these discrepancies derive from the way in which the policy is articulated while others derive from the ways in which inspectors interpret and operationalise this policy

This implementation is coloured and conditioned by several factors including the evidence on which inspectors base their judgements what counts as evidence in different policy contexts what counts as valid knowledge in inspection processes the qualities needed by inspectors working in differing policy contexts and the identities that they adopt in order to successfully carry out their work The book provides a valuable contribution to our understanding of the politics and practices which colour and shape the legitimacy and operational execution of inspection policy The work is unique in its focus on the inspectors role within the implementation of the inspection process an element often overlooked in the literature It also includes two chapters co written by inspectors offering unique insights into their life worlds and identities

World Politics in Translation Tobias Berger, Alejandro Esguerra, 2017-09-14 Virtually all pertinent issues that the world faces today such as nuclear proliferation climate change the spread of infectious disease and economic globalization imply objects that move However surprisingly little is known about how the actual objects of world politics are constituted how they move and how they change while moving This book addresses these questions through the concept of translation the simultaneous processes of object constitution transportation and transformation Translations occur when specific forms of knowledge about the environment international human rights norms or water policies consolidate travel and change World Politics in Translation conceptualizes translation for International Relations by drawing on theoretical insights from Literary Studies Postcolonial Scholarship and Science and Technology Studies The individual chapters explore how the concept of translation opens new perspectives on development cooperation the diffusion of norms and organizational templates the performance in and of international organizations or the politics of international security governance This book constitutes an excellent resource for students and scholars in the fields of Politics International Relations Social Anthropology Development Studies and Sociology Combining empirically grounded case studies with methodological reflection and theoretical innovation the book provides a powerful and productive introduction to world politics in translation

NICE Paul Atkinson, Sally Sheard, 2025-03-31 It may seem as if the National Institute of Health and Care Excellence NICE has always been part of the UK's health and social care landscape But this fascinating book charts the evolution of NICE from its origins 25 years ago as well as how this development illustrates many of the key themes effecting health care today In a period of rapid medical and technological advance NICE has been both a gatekeeper to ensure that health care resources are spent where they are needed most and a promoter of patient access to the best new technologies Through a detailed history the authors show how NICE's remit grew from health care to public health to social care advancing the use of evidence based policy making and health economics as it did so Playing a key role in ethical debates which often made the news NICE also re aligned the relationship between patients politicians and the pharmaceutical industry Written by two of the leading scholars in the field this fascinating history also situates NICE in an international context where it is often seen as a model to follow It will be key reading for students and researchers in the fields of health and social care and health policy as well as professionals and

Governing Public Health Mark L Flear, 2015-07-30 This book contributes towards EU studies and the growing discourse on law and public health It uses the EU's governance of public health as a lens through which to explore questions of legal competence and its development through policy and concrete techniques processes and practices risk and security human rights and bioethics accountability and legitimacy democracy and citizenship and the nature essence and future trajectory of the European integration project These issues are explored first by situating the EU's public health strategy within the overarching architecture of governance and subsequently by examining its operationalisation in relation to the key public health problems of cancer HIV AIDS and pandemic planning The book argues that the centrality and valorisation of scientific and technical knowledge and expertise in the EU's risk based governance means that citizen participation in decision making is largely marginalised and underdeveloped and that this must change if public health and the quality accountability and legitimacy of EU governance and its regulation are to be improved Subsequently the book goes on to argue that the legitimating discourses of ethics and human rights and the developing notion of EU supra stewardship responsibility can help to highlight the normative dimensions of governance and its interventions in public health These discourses and dimensions provide openings and possibilities for citizens to power technologies of participation and contribute important supplementary knowledge to decision making

The Politics of Intersectional Practice Ashlee Christoffersen, 2025-05-20 The Politics of Intersectional Practice has been shortlisted for the 2025 BSA Philip Abrams Memorial Prize It is increasingly recognized that to achieve social justice policies and organizations need to apply an intersectional approach rather than addressing inequalities separately However intersectionality is a challenging theory to apply as policy makers and practitioners often navigate the confines of divided policy areas This book examines the use of intersectionality in UK policy and practice with a specific focus on NGOs outlining five distinct interpretations of intersectional practice and their implications Drawing from extensive fieldwork with a diverse range of equality organizations this book offers invaluable insights into how policy and practice can be organized in more and less intersectional ways

The Politics of Scale in Policy Natalie Papanastasiou, 2019-05-29 Succeeding in the art of contemporary policymaking involves designing policies which reflect the deeply interconnected nature of political space Nevertheless policy continues to be articulated through age old categories and hierarchies of scale This book asks why scale occupies this enduring position of privilege in policymaking highlighting how scales are far from natural features of policy and that they are instead essential to the armoury of policy practice Drawing on empirical data from the field of education governance the book traces how scales are crafted and mobilised in policymaking practices demonstrating that scalecraft is key to understanding the production of hegemony

Global health and the new world order Jean-Paul Gaudillière, Claire Beaudevin, Christoph Gradmann, Anne M. Lovell, Laurent

Pordié,2020-10-06 The phrase global health appears ubiquitously in contemporary medical spheres from academic research programs to websites of pharmaceutical companies In its most visible manifestation global health refers to strategies addressing major epidemics and endemic conditions through philanthropy and multilateral private public partnerships This book explores the origins of global health a new regime of health intervention in countries of the global South born around 1990 examining its assemblages of knowledge practices and policies The volume proposes an encompassing view of the transition from international public health to global health bringing together historians and anthropologists to analyse why new modes of interventions on the life of others recently appeared and how they blur the classical divides between North and South The contributors argue that not only does the global health enterprise signal a significant departure from the postwar targets and modes of operations typical of international public health but that new configurations of action have moved global health beyond concerns with infectious diseases and state based programs The book will appeal to academics students and health professionals interested in new discussions about the transnational circulation of drugs bugs therapies biomedical technologies and people in the context of the neo liberal turn in development practices **Asia's Rising Research**

Dominance Mats Benner,2022-12-13 This is an open access title available under the terms of a CC BY NC ND 4 0 License It is free to read download and share on Elgaronline com Providing an in depth and cutting edge investigation into the rise of Asian research practices and paradigms Mats Benner examines how this rise has been accomplished what effects it has had and how it has shaped universities across seven Asian countries **Publics and Their Health Systems** Ellen

Stewart,2016-04-08 Drawing on a detailed case study of Scotland s National Health Service this book argues that debates about citizen participation in health systems are disproportionately dominated by techniques of invited participation A system s eye perspective while often well intentioned has blinded us to other standpoints for understanding the complex relationship between publics and their health systems Publics and Their Health Systems takes a citizen s eye perspective exploring not only conventional invited participation but also the realms of representative democracy contentious protest politics and the micro level tactics used by individual citizens in their encounters with health services The book highlights more oppositional dynamics than those which characterise much invited participation and argues that understanding these is a crucial step towards a more inclusive and democratic health system **The Politics of Expertise in International Organizations**

Annabelle Littoz-Monnet,2017-02-24 This edited volume advances existing research on the production and use of expert knowledge by international bureaucracies Given the complexity technicality and apparent apolitical character of the issues dealt with in global governance arenas evidence based policy making has imposed itself as the best way to evaluate the risks and consequences of political action in global arenas In the absence of alternative democratic modes of legitimation international organizations have adopted this approach to policy making By treating international bureaucracies as strategic actors this volume address novel questions why and how do international bureaucrats deploy knowledge in policy making

Where does the knowledge they use come from and how can we retrace pathways between the origins of certain ideas and their adoption by international administrations What kind of evidence do international bureaucrats resort to and with what implications Which types of knowledge are seen as authoritative and why This volume makes a crucial contribution to our understanding of the way global policy agendas are shaped and propagated It will be of great interest to scholars policy makers and practitioners in the fields of public policy international relations global governance and international organizations

Cultures of Participation Birgit Eriksson, Carsten Stage, Bjarki Valtýsson, 2019-09-05 This book examines cultural participation from three different but interrelated perspectives participatory art and aesthetics participatory digital media and participatory cultural policies and institutions Focusing on how ideals and practices relating to cultural participation express and re produce different cultures of participation an interdisciplinary team of authors demonstrate how the areas of arts digital media and cultural policy and institutions are shaped by different but interrelated contextual backgrounds Chapters offer a variety of perspectives and strategies for empirically identifying cultures of participation and their current transformations and tensions in various regional and national settings This book will be of interest to academics and cultural leaders in the areas of museum studies media and communications arts arts education cultural studies curatorial studies and digital studies It will also be relevant for cultural workers artists and policy makers interested in the participatory agenda in art digital media and cultural institutions

Methodological Reflections on Practice Oriented Theories Michael Jonas, Beate Littig, Angela Wroblewski, 2017-02-16 This volume presents a comprehensive overview of methodological issues and empirical methods of practice oriented research It examines questions regarding the scope and boundaries of practice oriented approaches and practice theory It discusses the potential advantages and disadvantages of the diversity resulting from the use of these approaches as well as method and methodology related issues The specific questions explored in this volume are What consequences are linked to the application of a praxeological perspective in empirical research when it comes to the choice of methods Is there such a thing as an ideal path to follow in praxeological empirical research What relationship is there between qualitative and quantitative approaches What differentiates practice based social research from other perspectives and approaches such as discourse analysis or hermeneutics The contributions in this book discuss these questions either from a methodological point of view or from a reflective perspective on empirical research practices

The Politics of Drugs Susanne MacGregor, 2017-07-19 This book explores the complexities of drugs policy in Britain contradicting the over simplified representation found in the public sphere It focuses on developments in Britain since the Misuse of Drugs Act of 1971 covering debates at national level and local experiences set in international and European context emphasizing the interconnectivity between people and countries in this global age Several institutions and networks are examined to illustrate how they shape the policy process as vessels for ideas and interests and as spaces for individual action MacGregor discusses arguments around drug policy reform in particular the role of politicians the media

and advocacy organizations Her aim is to encourage a more open and intelligent conversation on drugs policy and to question whether the institutional architecture in place is fit for purpose given the great increase of substances available and the underlying variety of conditions and interests currently competing for attention and resources The is a must read for all scholars of Politics Medicine and Social Science interested in the current debate raging around British Drug Policy
