1. BE PICKY

Red Delicious and Granny Smith apples have twice as many cancer fighters as Fuji or Golden Delicious apples.

2. EAT YOUR SPROUTS

Broccoli sprouts can contain more cancer-fighting properties than regular broccoli.

3. DUNK YOUR TEA BAG

Dunking a tea bag up and down releases more cancer-fighting molecules than letting the bag just sit in the cup.

4. COOK TOMATOES

Raw tomatoes are good, but cooking them with a source of fat is even better.

5. CHEW YOUR GREENS

Chewing leafy greens helps to release enzymes that activate cancer-fighting molecules embedded deep in the leaves.

6. GO SOY

Fermented soy, like the kind used in miso soup, contains four times more cancer fighters than regular soybeans.

7. CHOOSE ONE CANCER-FIGHTING FOOD FOR EACH MEAL.

At 3 meals each day, that adds up to more than a thousand cancer-fighting food choices each year.

Hall,2011-08-24 How John Hall s book is different from others John was diagnosed with Melanoma Cancer IV had surgery to remove 10 metastasized tumors but afterwards was informed by his Oncologist M D that there was little or no hope for recovery since Chemo and Radiation Therapy do not work on Melanoma John felt like he was facing immediate death in the next few months However under the guidance of a Holistic Nutritionist he was able to rebuild his Immune System As a result 2 years later has conquered his cancer As an ex Premedical student John had studied Inorganic and

Organic Chemistry so that he has been able to do research on the causes preventions and possible cures for cancers John is currently a Family Therapist in Roseville Ca and for the past 30 years has counseled the emotional and psychological issues of his clients He now also counsels cancer patients related to their emotional and relationship problems www.starlite.com roguelink.us His major goal is to help others build up their Immune System He believes from experience cancer can be cured with proper nutrition The book cover is a microscopic image of a neutrophil swallowing the anthrax bacteria as the best proof of EVIDENCE BASED NUTRITION IN SCIENCE TODAY an example of how the human immune system's defenses are what prevent diseases and cancers Further explained in Chapter 3 of the book The material he presents is brief in summary form and is easy to read He makes suggestions of the best foods to eat supplements and healthy waters to consider John learned doctors are not gods don't have the answers to what cures cancers and patients need to become aware that a healthy nutritional approach for their condition is a viable and doable program He did it and won He hopes you will too **Cancer -- Increasing Your Odds for Survival** David Bogner, 1998-08-13 A thorough state of the art overview of all current mainstream alternative and complementary methods of fighting cancer this book is the companion to the four part series of the same name hosted by Walter Cronkite airing on PBS TV in September 1998 **Cancer: 100 Ways to Fight** John Roberts, 2010-03-29 Cancer 100 Ways to Fight Your own attitude is your brightest guiding star Some of success is doing what you like to do But more of it is doing the things you don't like to do but must It is too easy to make an excuse and not do it and fail John Roberts As this book goes to press early in 2010 I am 75 and into my fifth year with incurable metastatic prostate cancer which had already spread to the bones before cancer was diagnosed and the prostate removed The statistical prognosis for the current treatments of choice is that one half of these patients will die within three years 75% within five This usually happens after the standard treatments and chemotherapy fail and must be discontinued due to harmful side effects or weakening effectiveness resumed cancer growth and the failure of bones or key organs I am still feeling fine no pain living a normal life and I have completed eight months of chemotherapy with a 63% drop in my PSA prostate cancer blood test without major side effects or rising PSA I have fought this cancer and its personal consequences in more than a hundred ways as described here Above all a lifetime of fitness and my current excellent physical and mental condition supplemented by great medical care and everything else I can learn or think of is partially responsible for my success in living beyond the average life span for my particular fatal disease We cannot know which weapon or how much each one contributes to the extension of life so we must use them all The doctors all say that cancer survival is very unpredictable and I figured that many of the positive outcomes must depend on how comprehensively and how hard the individual fights So I immediately started this book and organized my fight I was extremely unfortunate most prostate cancer either is so slow growing or eliminated by removal that survivors live for many years In my case it had already spread or metastasized to the bones prior to the operation and that cancer is inoperable and incurable But some people in that condition die very early

while others like me live much longer This is highly unpredictable in individual cases due to variation in patient condition treatment effectiveness and other unknowns More than half of all people newly diagnosed with cancer will be cured or given extended remission They will die of something else Of the other half a large number have treatable cancer and they still have many years to live The remainder probably including me have learned that they have incurable cancer that has grown too strong or spread and taken root in such places that it cannot be killed or removed and death is likely in the next few months or years Nevertheless normally incurable cancer and conventional predictability sometimes fail and others may prolong life by fighting with strong mental and physical effort As the disease progresses and is treated and science advances sometimes in great leaps we are rarely sure of which group we are in That uncertainty that hope and the dreadful power of cancer call for great strength of character and effort in both patients and those around them This book is about that The animal instinct to survive is in humans alone expanded in our unique cortex to something much greater the intelligent understanding of self awareness and an intense desire to prolong the experience growth and emotion of life The human spirit beyond the mere motivation of existence is largely responsible for all that our species has conquered and achieved It is an essential quality to be trained treasured and put to use and one of the finest ways is to survive continue and improve our exceptional life through our collective and individual intellect In the last century medical science the visibility of living in distant years and the recognition that we are and can be responsible for increasing our own longevity have ad
