How Buildings Learn:

How Buildings Learn Stewart Brand, 1994 Buildings have often been studied whole in space but never before have they been studied whole in time Architects and architectural historians are interested only in a building's original intentions Most are dismayed by what happens later when a building develops its own life responsive to the life within To get the rest of the story to explore the years between the dazzle of a new building and its eventual corpse Stewart Brand went to facilities managers and real estate professionals to preservationists and building historians to photo archives and to futurists He inquired What makes some buildings come to be loved He found that all buildings are forced to adapt but only some adapt gracefully How Buildings Learn is a masterful new synthesis which proposes that buildings adapt best when constantly refined and reshaped by their occupants and that architects can mature from being artists of space to becoming artists of time A rich resource and point of departure as stimulating for the general reader and home improvement hobbyist as for the building professional the book is sure to generate ideas provoke debate and shake up habitual thinking From the connected farmhouses of New England to I M Pei's Media Lab from satisficing to form follows funding from the evolution of bungalows to the invention of Santa Fe Style from Low Road military surplus buildings to a High Road English classic like Chatsworth this is a far ranging survey of unexplored essential territory More than any other human artifact buildings improve with time if they're allowed How Buildings Learn shows how to work with time rather than against it

How Buildings Learn Stewart Brand, 1997 Stewart Brand puts forward the radical proposal adapt best when constantly refined and reshaped by their occupants and that architects can mature from being artists of time

How Buildings Learn Stewart Brand, 1995-10-01 A captivating exploration of the ever evolving world of architecture and the untold stories buildings tell When a building is finished being built that isn't the end of its story More than any other human artifacts buildings improve with time if they're allowed to Buildings adapt by being constantly refined and reshaped by their occupants and in that way architects can become artists of time rather than simply artists of space From the connected farmhouses of New England to I M Pei's Media Lab from the evolution of bungalows to the invention of Santa Fe Style from Low Road military surplus buildings to a High Road English classic like Chatsworth this is a far ranging survey of unexplored essential territory Discover how structures become living organisms shaped by the people who inhabit them and learn how architects can harness the power of time to create enduring works of art through the interconnected worlds of design function and human ingenuity

How Buildings Learn Stewart Brand, 1995-10-01 Like people buildings change with age forced to adapt to the needs of current occupations This provocative examination of buildings that have adapted well and some that haven't calls for a dramatic rethinking in the way new buildings are designed one that allows structures to grow and change easily with the environment Photos

Subject
To Change: Creating Great Products & Services for an Uncertain World Peter Merholz, Todd Wilkens, Brandon

Schauer, David Verba, 2008-04-15 To achieve success in today's ever changing and unpredictable markets competitive businesses need to rethink and reframe their strategies across the board. Instead of approaching new product development from the inside out, companies have to begin by looking at the process from the outside in, beginning with the customer experience. It's a new way of thinking and working that can transform companies struggling to adapt to today's environment into innovative, agile, and commercially successful organizations. Companies must develop a new set of organizational competencies: qualitative customer research to better understand customer behaviors and motivations; an open design process to reframe possibilities and translate new ideas into great customer experiences; and agile technological implementation to quickly prototype ideas, getting them from the whiteboard out into the world where people can respond to them. In *Subject to Change: Creating Great Products and Services for an Uncertain World*, Adaptive Path, a leading experience strategy and design company, demonstrates how successful businesses can and should use customer experiences to inform and shape the product development process from start to finish.

Place and Phenomenology Janet Donohoe, 2017-03-17 This cross-disciplinary book uses phenomenological method and description to explore questions of place, underscoring the significance of phenomenology for place and place for phenomenology. The book brings together prominent scholars in phenomenology of place. Covering a range of issues from sacred places to embodiment and identity and from environmental art and architecture to liminal places, the contributors explore theoretical foundations through thinkers such as Heidegger, Marion, Young, Husserl, and Leopold, among others. Phenomenological method and description are brought to bear on concrete places such as rivers, the Himalayas, modern transit, sacred architecture, and more. The book is accessible and pertinent to ongoing discussions in human geography, architectural theory, environmental studies, and philosophy of place. Provocative and imaginative, the essays provide a much-needed look at the contributions of phenomenology to as well as the role of place in contemporary philosophical and environmental discussions.

Special Structural Topics Paul McMullin, Jonathan Price, Sarah Simchuk, 2017-07-20 *Special Structural Topics* covers specialty structural situations for students and professional architects and engineers such as soil mechanics, structural retrofit, structural integrity, cladding design, blast considerations, vibration, and structural sustainability. As part of the *Architect's Guidebooks to Structures* series, it provides a comprehensive overview using both imperial and metric units of measurement with more than 150 images. As a compact summary of key ideas, it is ideal for anyone needing a quick guide to specialty structural considerations.

Architecture, Theology, and Ethics Elise M. Edwards, 2024-03-18 *Architecture, Theology, and Ethics: Making Architectural Design More Just* argues that architecture design and creativity are theological and ethical concerns that ought to be considered more deeply by Christians who are committed to social and environmental justice. Elise M. Edwards discusses the significance of architectural design entering into ongoing conversations in theological ethics and aesthetics. She argues that architectural design is not just a professional practice for wealthy clients but rather an activity that everyday people undertake when making choices that

shape the spaces they inhabit If Christians think theologically about their agency in these decisions they will discover that architectural design becomes an opportunity to contribute to the flourishing for humanity and God's creation Edwards proposes an approach to architectural design that presents it as prophetic action with the power to shape our world This book then presents five moral commitments that guide design intentions and the process of design towards justice and inclusion Grounded in liberationist feminist and womanist thought Architecture Theology and Ethics makes a compelling case for architecture's relevance to Christian ethics and theology Edward Prior Martin Godfrey Cook,2015-08-31 Edward Schroder Prior designed the cathedral of the Arts and Crafts Movement St Andrew's Church Roker perfected the popular butterfly plan in his houses and published what is still the seminal work on medieval gothic art in England in 1900 Highly regarded by critics such as Ian Nairn Prior is sometimes considered to have narrowly missed out on a place in the architectural pantheon of his age alongside contemporaries such as Charles Voysey and William Lethaby The result of extensive archival and field research Edward Prior Arts and Crafts Architect sheds new light on Prior's architecture life and scholarship Extensively illustrated it showcases Prior's work in colour including many of his architectural drawings and photographs of most of his extant buildings Prior is the missing link of the Arts and Crafts Movement in both a theoretical and a practical sense as he was possibly the only practitioner who genuinely translated the artistic theories of Ruskin and Morris into architectural reality He went on to found the School of Architecture at the University of Cambridge in 1912 Extensively illustrated with 200 colour illustrations including many of his architectural drawings and photographs of most of his extant buildings **1,000 Books to Read Before You Die** James Mustich,2018-10-02 The ultimate literary bucket list THE WASHINGTON POST Celebrate the pleasure of reading and the thrill of discovering new titles in an extraordinary book that's as compulsively readable entertaining surprising and enlightening as the 1 000 plus titles it recommends Covering fiction poetry science and science fiction memoir travel writing biography children's books history and more 1 000 Books to Read Before You Die ranges across cultures and through time to offer an eclectic collection of works that each deserve to come with the recommendation You have to read this But it's not a proscriptive list of the great works rather it's a celebration of the glorious mosaic that is our literary heritage Flip it open to any page and be transfixed by a fresh take on a very favorite book Or come across a title you always meant to read and never got around to Or like browsing in the best kind of bookshop stumble on a completely unknown author and work and feel that tingle of discovery There are classics of course and unexpected treasures too Lists to help pick and choose like Offbeat Escapes or A Long Climb but What a View And its alphabetical arrangement by author assures that surprises await on almost every turn of the page with Cormac McCarthy and The Road next to Robert McCloskey and Make Way for Ducklings Alice Walker next to Izaak Walton There are nuts and bolts too best editions to read other books by the author if you like this you'll like that recommendations and an interesting endnote of adaptations where appropriate Add it all up and in fact there are more than six thousand titles by nearly four

Circular Economy and Sustainability Alexandros Stefanakis,Ioannis Nikolaou,2021-09-14 The concept of circular economy is based on strategies practices policies and technologies to achieve principles related to reusing recycling redesigning repurposing remanufacturing refurbishing and recovering water waste materials and nutrients to preserve natural resources It provides the necessary conditions to encourage economic and social actors to adopt strategies toward sustainability However the increasing complexity of sustainability aspects means that traditional engineering and management economics alone cannot face the new challenges and reach the appropriate solutions Thus this book highlights the role of engineering and management in building a sustainable society by developing a circular economy that establishes and protects strong social and cultural structures based on cross disciplinary knowledge and diverse skills It includes theoretical justification research studies and case studies to provide researchers practitioners professionals and policymakers the appropriate context to work together in promoting sustainability and circular economy thinking Volume 1

Circular Economy and Sustainability Management and Policy discusses the content of circular economy principles and how they can be realized in the fields of economy management and policy. It gives an outline of the current status and perception of circular economy at the micro, meso and macro levels to provide a better understanding of its role in achieving sustainability. Volume 2 Circular Economy and Sustainability Environmental Engineering presents various technological and developmental tools that emphasize the implementation of these principles in practice. micro level It demonstrates the necessity to establish a fundamental connection between sustainable engineering and circular economy. Presents a novel approach linking circular economy concepts to environmental engineering and management to promote sustainability goals in modern societies. Approaches the topic on production and consumption at both the micro and macro levels integrating principles with practice. Offers a range of theoretical and foundational knowledge in addition to case studies that demonstrate the potential impact of circular economy principles on both economic and societal progress. *Loose-Fit Architecture* Alex Lifschutz, 2018-02-05 Loose Fit Architecture Designing Buildings for Change September October 2017 Profile 249 Volume 87 No 5 ISBN 978 1119 152644 Guest Edited by Alex Lifschutz The idea that a building is finished or complete on the day it opens its doors is hardwired into existing thinking about design planning and construction. But this ignores the unprecedented rate of social and technological change. A building only begins its life when the contractors leave. With resources at a premium and a greater need for a sustainable use of building materials, can we still afford to construct new housing or indeed any buildings that ignore the need for flexibility or the ability to evolve over time. Our design culture needs to move beyond the idealisation of a creative individual designer generating highly specific forms with fixed uses. The possibilities of adaptation and flexibility have often been overlooked but they create hugely exciting loose fit architectures that emancipate users to create their own versatile and vibrant environments. Contributors include Stewart Brand, Renee Chow, Ellen Dunham Jones and June Williamson, John Habraken, Edwin Heathcote, Despina Katsakakis, Stephen Kendall, Ian Lambot, Giorgio Macchi, Alexi Marmot, Andrea Martin, Kazunobu Minami, Peter Murray, Brett Steele and Simon Sturgis.
