Bliss Brain Dawson Church, 2020-09-15 Award Winner in the Science category of the 2020 Best Book Awards sponsored by American Book Fest Award winning author and thought leader Dawson Church Ph D blends cutting edge neuroscience with intense firsthand experience to show you how you can rewire your brain for happiness starting right now Neural plasticity the discovery that the brain is capable of rewiring itself is now widely understood But what few people have grasped yet is how quickly this is happening how extensive brain changes can be and how much control each of us has over the process In *Bliss Brain* famed researcher Dawson Church digs deep into leading edge science and finds stunning evidence of rapid and radical brain change In just eight weeks of practice

12 minutes a day using the right techniques we can produce measurable changes in our brains. These make us calmer, happier and more resilient. When we cultivate these pleasurable states over time, they become traits. We don't just feel more blissful as a temporary state; the changes are literally hard-wired into our brains, becoming stable and enduring personality traits. The startling conclusions of Church's research show that neural remodeling goes much farther than scientists have previously understood, with stress circuits shriveling over time. Simultaneously, the Enlightenment Circuit associated with happiness, compassion, productivity, creativity and resilience expands. During deep meditation, Church shows how the 7 neurochemicals of ecstasy are released in our brains. These include anandamide, a neurotransmitter that's been named the bliss molecule because it mimics the effects of THC, the active ingredient in cannabis. It boosts serotonin and dopamine; the first is an analog of psilocybin, the second of cocaine. He shows how cultivating these elevated emotional states literally produces a self-induced high. While writing *Bliss Brain*, Church went through a series of disasters, including escaping seconds ahead of a California wildfire that consumed his home and office and claimed 22 lives. The fire triggered a painful medical condition and a financial disaster. Through it all, Church steadily practiced the techniques of Bliss Brain while teaching them to thousands of other people. This book weaves his story of resilience into the fabric of neuroscience, producing a fascinating picture of just how happy we can make our brains, no matter what the odds.

21 Rituals to Change Your Life Theresa Cheung, 2017-03-14 Aristotle said you are what you repeatedly do. Most of us have no idea that what we repeatedly do creates our lives; we think our future is shaped by big events, the decisions we make, the thoughts we have, but this book will show you that it is your daily actions that are the key. Over the last few decades, neuroscientists and psychologists have discovered that there is more power in *I do* than *I think*. However, if an action is repeated enough times, it becomes habit, but habits lack thought, consideration and presence. To effect long-lasting, meaningful change, our actions need to be filled with a sense of personal meaning and power; they need to be ritualized. Creating personal ritual in our lives allows us to bring the presence of the sacred into the everyday. The rituals in this book have been designed as symbolic acts, providing a framework for anyone to use to create positive change in their lives. The 7 morning rituals are designed to help you wake with determination; the 7 afternoon rituals focus on living on purpose, and the 7 evening rituals are about retiring with satisfaction.

Break Through the Limits of the Brain Joseph Selbie, 2025-09-12 A life-changing guide to understanding your brain and how to change it for good. *Break Through the Limits of the Brain* explores the neuroscience of sacred, superconscious experience. It offers proven ways to break through the brain's limits into a life-changing, life-enhancing awareness that is beyond our everyday consciousness, an awareness that is intuitive, creative, energized, joyful and spirit-filled. The book offers many practices, the Hong Sau technique of meditation for deepening concentration, energization exercises for

increasing life force and vitality methodical introspection techniques for identifying neurally reinforced negative patterns of thought emotion and behavior and affirmations for directly rewiring them These practices will help you bring superconscious awareness into your life that enables awakens and supports success vitality creativity health peace of mind and lasting fulfilling happiness Break Through the Limits of the Brain provides strong scientific support for superconscious awareness scientific support provided by quantum physics and M theory for the existence of a subtle nonlocal reality a reality in which we exist simultaneously with physical reality a reality of which we can become aware by breaking through the limits of the brain The book debunks scientific materialism s brain based explanation for consciousness and intelligence the brain as supercomputer model and explains the view of many prominent and open minded scientists that an all pervading intelligent consciousness is not only the source of our own consciousness but also the foundation of reality an age old sacred belief shared by saints sages mystics and those who ve had near death experiences Meditation is a central theme of the book what it is how to do it why it works its physical mental and emotional benefits as measured by neuroscientists and how it rewires the brain for us to experience superconscious awareness and to achieve whatever we put our mind to **The Ten Worlds**

Ash ElDifrawi,Alex Lickerman,2018-10-02 What exactly is happiness that we spend our lives pursuing it more fiercely than anything else The answer Drs Lickerman and ElDifrawi argue is that happiness isn t just a good feeling but a special good feeling in fact the best good feeling we re capable of having Enduring happiness is something we all want yet many of us fail to achieve Look around you How many people do you know who would say they feel a constant and powerful sense of satisfaction with their lives How many people do you imagine wouldn t find their ability to be happy impaired by a significant loss like the death of a parent a spouse or a child How is it possible to be happy in the long term when so many terrible things are destined to happen to us In this highly engaging and eminently practical book told in the form of a Platonic dialogue recounting real life patient experiences Drs Lickerman and ElDifrawi assert that the reason genuine long lasting happiness is so difficult to achieve and maintain is that we re profoundly confused not only about how to go about it but also about what happiness is In identifying nine basic erroneous views we all have about what we need to be happy views they term the core delusions Lickerman and ElDifrawi show us that our happiness depends not on our external possessions or even on our experiences but rather on the beliefs we have that shape our most fundamental thinking These beliefs they argue create ten internal life conditions or worlds through which we continuously cycle and that determine how happy we re able to be Drawing on the latest scientific research as well as Buddhist philosophy Lickerman and ElDifrawi argue that once we learn to embrace a correct understanding of happiness we can free ourselves from the suffering the core delusions cause us and enjoy the kind of happiness we all want the kind found in the highest of the Ten Worlds the world of Enlightenment The Ten Worlds Hell Hunger Animality Anger Tranquility Rapture Learning Realization Compassion Enlightenment **The Automatic Writing Experience (AWE)** Michael Sandler,2021-02-16 An AWE Inspiring Adventure Automatic writing can do

Jones, 2025-03-01 Examines how mystical practices and experiences are being applied in secular contexts today Today is an exciting time for mysticism Interest in mysticism today often involves what Aldous Huxley called applied mysticism that is taking mystical practices and experiences out of their traditional contexts where the focus was on the total transformation of the individual and applying them often within a secular framework to help other people with more limited worldly problems such as a person's well being in society or general social change Neuroscientists are taking mystical experiences seriously studying meditators and psychedelic subjects to gain knowledge of how the brain works Cognitive scientists are exploring mystical altered states of consciousness to expand the spectrum of consciousness states in particular whether there is a state of pure consciousness Buddhist meditation is being taken out of its religious contexts and adapted by psychotherapists to help with problems such as depression or addiction The use of psychedelics in psychotherapy is also gaining traction while New Age thinkers are extolling the alleged merger of post Newtonian science with mysticism Mystical ideas are being adapted to problems on the social level for example in socially engaged Buddhism This is the first book to explore all these varieties of applied mysticism together and to examine the current state of the field with a focus on philosophical issues in a readily accessible manner *Church, Capitalism, and Democracy in Post-Ecological Societies* Cheng-tian Kuo, 2018-10-24 Most ecotheologies build their arguments on the Bible's creation story and resurrection narrative in the hope to save the ecology through spiritual meditation reforming capitalism and or deliberative democracy However based on a Chinese Christian social scientist's perspective this book argues that few of these ecotheologies are theologically and empirically valid Instead it proposes a neuro institutional post ecology theology that builds on the major themes of the Last Judgment to refocus ecotheology toward evangelism and to adapt ecotheology to capitalism and democracy in order to embrace the already but not yet impacts of the inevitable total destruction of the ecology in the near future The vanities in current ecotheologies are divided into religious economic and political categories Among the major ones discussed in this book are the vanities of ecological meditation theology leftist and rightist economic theologies as well as ecotheologies of green authoritarianism and deliberative democracy Even if these ecotheologies work perfectly as they were intended to global ecological crises have passed the point of no return i.e. post ecology and rendering all of them a global vanity Based on a Chinese Christian social scientist's perspective this book proposes a moderate course of ecological spirituality economic behaviors and democratic actions but with a radical devotion to crisis management and evangelism in preparation for the Domsdays This book is unique in its balanced interdisciplinary composition employing theories from cognitive science Christian theology economics and political science **The Varieties of Spiritual Experience** David B.
