An update to the best selling Joomla title on the market this is the Joomla book to get. **Joomla 3 Seo & Performance** Simon Kloostra, 2014-07-17. Attracting many visitors on a fast loading Joomla website is the main goal we are trying to achieve in this book. While we will discuss some off site SEO topics we will mainly focus on on site SEO. Chapter 1 We start off with a small introduction in the world of SEO with some terminology that you should know to understand the rest of the book. Chapter 2 will tell you what you can do with the Joomla core options. We will start with the basics like setting metadata, titles, microdata and correct URLs but also advanced topics will be discussed like fighting duplicate content, setting up 301 redirects, 404 pages, canonical URLs etc. Even with the Joomla core options we can get a well optimized website that scores well in the Google rankings. Chapter 3 With the use of some small modules and plugins we will expand our possibilities even more. Some of these tools are extremely user friendly while some require some more knowledge. Chapter 4 For those that are really serious about SEO you need a full SEO extension. SH404SEF is the most popular and used one. While the options it offers may seem a bit overwhelming we will take you through all the necessary settings. Chapter 5 Once our website is published and live we will work on some off site SEO efforts like setting up Google, Bing, Webmaster Tools and Analytics accounts and how to use them but also linkbuilding and social media efforts will be shortly discussed. Chapter 6 is dedicated to tips to speed up your Joomla website. With these instructions you should be able to make your website load in 2 seconds or less which makes the website much more attractive to browse through. Topics in this chapter will be caching, Gzip, setting up CDNs, CSS and Javascript optimization, image optimization and some extensions that can assist these processes. Both beginners and advanced users will appreciate this book which is written by the author of the Joomla SEO net blog, one of the most popular resources on the web regarding Joomla SEO. While the book is written for Joomla 3 it still works equally well for Joomla 2.5 only the screenprints have a slightly different look.
