

less is more.

This new Johnson 50 packs more performance into less space than any mid-range outboard motor. Ever.

The usual thing is to try to make it bigger and better. Johnson engineers set out to make the new Sea-Horse 50 **SMALLER** and better — and achieved a very unusual thing indeed! Its striking silhouette is the most obvious result of this "less is more" approach, but only hints at even more dramatic interior innovations.

First of all, this two-cylinder engine is **LOOP CHARGED** —

a more efficient method of recharging cylinders with a fresh mix of fuel and air, then scavenging the burnt gases from those cylinders.

Loop-charging brings fuel in and exhaust out in one continuous loop through a series of aimed ports. Our design employs lighter, cooler running, flat-topped pistons and domed combustion chambers. It's a hot idea that increases horsepower, decreases weight and fuel consumption.

Johnson's unique **PRESSURE-BACK PISTON RING*** helps to seal the combustion chamber by using compression to force the ring against the cylinder wall. Results, reduced friction and engine wear, improved fuel economy. There's a new fuel saving system too, which combines a pair of newly designed carburetors with "straight-in" fuel induction and no fuel trapping pockets. Another drain free motor from Johnson.

*Patent applied for.

6" lower off the transom than other 50 hp outboards

The solid state **CAPACITOR DISCHARGE IGNITION** system is a new magnetic controlled type.

There are no moving mechanical parts — no distributor, no belts, no breaker points. It will even provide ignition for the engine without the battery. The spark plugs are a new surface-gap type with tungsten alloy electrodes. They should provide up to 1,000 hours of use in this engine.

THE COOLING SYSTEM is both thermostatically controlled and (for the first time) pressure controlled.

At low speeds, the engine is kept warm for smooth running and fuel efficiency. At higher speeds, water circulation is increased. The engine runs appreciably cooler at full throttle than it does at idle, so you get more power at the high end and increased engine life.

EXHAUST-TUNING is achieved with an internal closed end megaphone system. It results in more power on less fuel. Power shifting is standard equipment on this motor, along with our exclusive single-lever remote control which combines the key-switch, choke and throttle. Choose from eight standard or six high performance props as optional extras.

From idle to full throttle, this outboard is a new experience. No other motor — in our line or anyone else's — offers so much of tomorrow, today. Your Johnson dealer is showing it right now. Stop in soon. Or write for free catalog: Johnson Motors, Waukegan, Ill. 60085, Dept. SD-271.
