for new developments in GNC are the ever higher safety and sustainability requirements in aviation. Impressive progress was made in new research fields such as sensor and actuator fault detection and diagnosis, reconfigurable and fault tolerant flight control, online safe flight envelop prediction and protection, online global aerodynamic model identification, online global optimization and flight upset recovery. All of these challenges depend on new online solutions from on board computing systems. Scientists and engineers in GNC have been developing model based sensor based as well as knowledge based approaches aiming for highly robust adaptive nonlinear intelligent and autonomous GNC systems. Although the papers presented at the conference and selected in this book could not possibly cover all of the present challenges in the GNC field, many of them have indeed been addressed and a wealth of new ideas, solutions and results were proposed and presented. For the 2nd CEAS Specialist Conference on Guidance, Navigation and Control, the International Program Committee conducted a formal review process. Each paper was reviewed in compliance with good journal practice by at least two independent and anonymous reviewers. The papers published in this book were selected from the conference proceedings based on the results and recommendations from the reviewers.

[Missing: Believed Killed](#) Roy Conyers Nesbit, 2010-08-19. The uncertain fates of Amelia Earhart, Amy Johnson and Glenn Miller have fascinated readers and aviation historians ever since they disappeared. Even today more than half a century after their final flights, what happened to them is still the subject of speculation.

conspiracy theory and controversy This has prompted Roy Conyers Nesbit to reinvestigate their stories and to write this perceptive level headed and gripping study Using testimony from new witnesses and hitherto undisclosed public records he seeks to explain why they were reported missing believed killed He describes why American aviatrix Amelia Earhart vanished in the Pacific on her round the world flight in 1937 what caused the death of Britains aviation heroine Amy Johnson over the Thames estuary in 1941 and what really killed band leader Glenn Miller on his doomed flight to Paris in 1944 And he applies the same expert forensic eye to other tragic aerial mysteries of the period including the flying boat crash that claimed the life of the Duke of Kent in Scotland in 1942 This classic study issued here for the first time in paperback will be fascinating reading for students of aviation history and for anyone who is intrigued by tales of flights into the unknown
