Jorge Otero Pailos The Ethics Of Dust:

Jorge Otero-Pailos Eva Ebersberger, Daniela Zyman, 2009 Estoy interesado en cómo hacemos la transición como personas de una fase de la vida a otra y como culturas de un período histórico a otro Las transiciones son a menudo difíciles tal vez incluso atemorizantes Con esta presentación podemos imaginar que el trabajo del arquitecto artista Jorge Otero Pailos es diferente especialmente respecto a cómo entendemos el paso del tiempo de la arquitectura en la historia The Ethics of Dust evidencia la limpieza del polvo y los residuos de contaminación de reconocidos edificios y monumentos históricos Haciendo visible lo invisible **Jorge Otero-Pailos: The Ethics of Dust**, 2009 **Jorge Otero-Pailos**, 2016 The Explicit Material Hanna B. Hölling, Francesca G. Bewer, Katharina Ammann, 2019-05-20 The Explicit Material gathers varied perspectives from the discourses of conservation curation and humanities disciplines to focus on aspects of heritage transmission and material transitions The authors observe and explicate the myriad transformations that works of different kinds manuscripts archaeological artefacts video art installations performances film and built heritage may undergo changing contexts changing matter changing interpretations and display Focusing on the vibrant materiality of artworks and artefacts The Explicit Material puts an emphasis on objects as complex constructs of material relations By so doing it announces a shift in sensibilities and understandings of the significance of objects and the materials they are made of and on the increasingly blurred boundaries between the practices of conservation and curation *Rethinking Global Modernism* Vikramaditya Prakash, Maristella Casciato, Daniel E. Coslett, 2021-11-22 This anthology collects developing scholarship that outlines a new decentred history of global modernism in architecture using postcolonial and other related theoretical frameworks By both revisiting the canons of modernism and seeking to decolonize and globalize those canons the volume explores what a genuinely global history of architectural modernism might begin to look like Its chapters explore the historiography and weaknesses of modernism's normative interpretations and propose alternatives to them The collection offers essays that interrogate transnationalism in new ways reconsiders the agency of the subaltern and the roles played by infrastructures materials and global institutions in propagating a diversity of modernisms internationally Issues such as colonial modernism architectural pedagogy cultural imperialism and spirituality are engaged With essays from both established scholars and up and coming researchers this is an important reference for a new understanding of this crucial and developing topic *Maintenance Architecture* Hilary Sample, 2016-12-02 An inventive examination of a crucial but neglected aspect of architecture by an architect writing to architects Maintenance plays a crucial role in the production and endurance of architecture yet architects for the most part treat maintenance with indifference The discipline of architecture values the image of the new over the lived in the photogenic empty and stark building over a messy and labored one But the fact is homes need to be cleaned and buildings and cities need to be maintained and architecture no matter its form cannot escape from such realities In Maintenance Architecture Hilary Sample offers an inventive examination of the architectural

significance of maintenance through a series of short texts and images about specific buildings materials and projects Although architects have seldom choose to represent maintenance imagining their work only from conception to realization artists have long explored subjects of endurance and permanence in iconic architecture Sample explores a range of art projects by artists including Gordon Matta Clark Jeff Wall and Mierle Laderman Ukeles to recast the problem of maintenance for architecture How might architectural design and discourse change as a building cycle expands to include post occupancy Sample looks particularly at the private home exhibition pavilion and high rise urban building giving special attention to buildings constructed with novel and developing materials technologies and precise detailing in relation to endurance These include Buckminster Fuller s Dymaxion House 1929 the Lever House 1952 the U S Steel Building 1971 and the O 14 2010 She considers the iconography of skyscrapers maintenance workforces both public and private labor saving technology and devices and contemporary architectural projects and preservation techniques that encompass the afterlife of buildings A selection of artworks make the usually invisible aspects of maintenance visible from Martha Rosler s Cleaning the Drapes to Inigo Manglano Ovalle s The Kiss

Prioritizing People in Ethical Decision-Making and Caring for Cultural Heritage Collections Nina Owczarek, 2023-06-27 While historically focusing on the object the study of ethics in conservation has expanded to consider the human aspect of conservation work This book offers a flexible framework to guide decision making in line with this development offering an inclusive compassionate approach to collections care This edited volume contributes theories and international examples for advancing conservation practice and providing best practice for the field that centers people in conservation of cultural heritage and collections care The first part examines the ethical theory that underpins conservation decision making by challenging outdated norms introducing updated methods and demonstrating new ways to approach compassionate collections care The second part considers the challenges of human centered ethics in conservation practice while the final part provides real world examples and case studies of these best practices in action including successful challenges to colonial authority By presenting both theoretical and practical aspects of prioritizing people this volume establishes the need for rethinking conservation approaches while demonstrating how to do so effectively Combining theory and practice Prioritizing People in Ethical Decision Making and Caring for Cultural Heritage Collections is valuable reading for conservation professionals including collections managers conservators curators and registrars It will also benefit students working in Cultural Heritage Conservation Museum studies and Heritage Studies as well as those taking courses in Art History and Anthropology

The superREUSE Manifesto Graeme Brooker, 2025-09-30 The superREUSE Manifesto is a critical exploration of ideas research and practices in reuse Reuse identifies insights into cities buildings interiors and objects constructed through working with extant material Super is an elevated pitch for a 21st century that is characterised by responses to the challenges of the climate emergency and social justices The superREUSE Manifesto coalesces ideas in the designed and built environment that react and work with these challenges It is an

uncompromising collection of ideas and propositions designed to stimulate its reader to rethink their position in relation to how we must transform everything into its superREUSE **Materials of Culture** Liedeke Plate, László Munteán, Airin Farahmand, 2023-06-12 While the so called material turn in the humanities and the social sciences has inspired a vibrant discourse on objects things and the concept of materiality in general less attention has been paid to materials particularly in cultural studies scholarship With each of its chapters taking a particular material as its point of departure this volume offers a palette of fresh approaches to materials within the realm of cultural studies The contributors call for a materials based perspective on culture which has become all the more pertinent in times of climate change energy crisis conflict migration and the lingering coronavirus pandemic **Architecture in Abjection** Zuzana Kovar, 2017-11-30 This book marks a turning point in architectural theory by using philosophy to examine the field anew Breaking from the traditional dualism within architecture which presents the body as subject and space as object it examines how such rigid boundaries can be softened Zuzana Kovar thus engages with complementary and complex ideas from architecture philosophy feminist theory and other subjects demonstrating how both bodies and bodily functions relate deeply to architecture Extending philosopher Julia Kristeva's notion of abjection the confrontation of one's own corporeality as something is excreted Kovar finds parallels in the concept of the scaffold Much like living bodies and their products can impact on the buildings that house them old skin cells create dust menstrual blood stains our breath heats and cools surfaces scaffolding is similarly ephemeral and yet not entirely separable from the architecture it supports Kovar shifts the conversation about abjection towards a more nuanced idea of architecture where living organisms building matter space decay and waste are all considered as part of a continual process drawing on the key informing works of thinkers like Gilles Deleuze and Felix Guattari to do this Including a number of experimental projects conducted in the spaces inhabited by the author herself to illuminate the theory at its core the book forms a distinguished and pioneering study designed for practitioners and scholars of architecture philosophy and visual culture alike **Melancholy and the Landscape** Jacky Bowring, 2016-07-07 Written as an advocacy of melancholy's value as part of landscape experience this book situates the concept within landscape's aesthetic traditions and reveals how it is a critical part of ethics and empathy With a history that extends back to ancient times melancholy has hovered at the edges of the appreciation of landscape including the aesthetic exertions of the eighteenth century Implicated in the more formal categories of the Sublime and the Picturesque melancholy captures the subtle condition of beautiful sadness The book proposes a range of conditions which are conducive to melancholy and presents examples from each including The Void The Uncanny Silence Shadows and Darkness Aura Liminality Fragments Leavings Submersion Weathering and Patina **Drawing Climate** Daniel Ryan, Jennifer Ferng, Erik L'Heureux, 2021-11-08 Ephemeral phenomena like fire precipitation shade and wind have emerged as important contemporary protagonists for environmental design due to their dynamic impact on buildings and cities The importance of including these forces in architecture has gained rapid momentum in the global

quest for sustainability This book investigates the history theory and applications of climatic design in the built environment examining architecture and landscapes from various time periods Based on a collaboration between the University of Sydney and the National University of Singapore the book brings together contributing authors from Australia Singapore and the United States Dry Wet Cool and Hot divide the book into categories through which a wide array of representational topics are covered from dust storms and clouds to ice and bushfires A concluding section presents project examples for exploratory application in the design of architecture

Subnature David Gissen,2012-03-20 We are conditioned over time to regard environmental forces such as dust mud gas smoke debris weeds and insects as inimical to architecture Much of today s discussion about sustainable and green design revolves around efforts to clean or filter out these primitive elements While mostly the direct result of human habitation these subnatural forces are nothing new In fact our ability to manage these forces has long defined the limits of civilized life From its origins architecture has been engaged in both fighting and embracing these so called destructive forces In Subnature David Gissen author of our critically acclaimed Big and Green examines experimental work by today s leading designers scholars philosophers and biologists that rejects the idea that humans can somehow recreate a purely natural world free of the untidy elements that actually constitute nature Each chapter provides an examination of a particular form of subnature and its actualization in contemporary design practice The exhilarating and at times unsettling work featured in Subnature suggests an alternative view of natural processes and ecosystems and their relationships to human society and architecture R Sie n s Mosquito Bottleneck house in Trinidad uses a skin that actually attracts mosquitoes and moves them through the building while keeping them separate from the occupants In his building designs the architect Philippe Rahm draws the dank air from the earth and the gasses and moisture from our breath to define new forms of spatial experience In his Underground House Mollier House and Omnisport Hall Rahm forces us to consider the odor of soil and the emissions from our body as the natural context of a future architecture Cero 9 s design for the Magic Mountain captures excess heat emitted from a power generator in Ames Iowa to fuel a rose garden that embellishes the industrial site and creates a natural mountain rising above the city s skyline Subnature looks beyond LEED ratings green roofs and solar panels toward a progressive architecture based on a radical new conception of nature

Waste Matters Nikole Bouchard,2020-12-01 For thousands of years humans have experimented with various methods of waste disposal from burning and burying to simply packing up and moving in search of an unscathed environment Habits of disposal are deeply

ingrained in our daily lives so casual and continual that we rarely ever stop to ponder the big picture effects on social spatial and ecological orders Rethinking the ways in which we produce collect discard and reuse our waste whether it s materials spaces or places is essential to ensure a more feasible future Waste Matters Adaptive Reuse for Productive Landscapes presents a series of historical and contemporary design ideas that reimagine a range of repurposed materials at diverse scales and in various contexts by exploring methods of hacking disassembly reassembly recycling adaptive reuse and preservation of the built environment Waste Matters will inspire designers to sample and rearrange bits of artifacts from the past and present to produce culturally relevant and ecologically sensitive materials objects architecture and environments

Plaster Monuments Mari Lending,2017-12-05 We are taught to believe in originals In art and architecture in particular original objects vouch for authenticity value and truth and require our protection and preservation The nineteenth century however saw this issue differently In a culture of reproduction plaster casts of building fragments and architectural features were sold throughout Europe and America and proudly displayed in leading museums The first comprehensive history of these full scale replicas Plaster Monuments examines how they were produced marketed sold and displayed and how their significance can be understood today Plaster Monuments unsettles conventional thinking about copies and originals As Mari Lending shows the casts were used to restore wholeness to buildings that in reality lay in ruin or to isolate specific features of monuments to illustrate what was typical of a particular building style or era Arranged in galleries and published in exhibition catalogues these often enormous objects were staged to suggest the sweep of history synthesizing structures from vastly different regions and time periods into coherent narratives While architectural plaster casts fell out of fashion after World War I Lending brings the story into the twentieth century showing how Paul Rudolph incorporated historical casts into the design for the Yale Art and Architecture building completed in 1963 Drawing from a broad archive of models exhibitions catalogues and writings from architects explorers archaeologists curators novelists and artists Plaster Monuments tells the fascinating story of a premodernist aesthetic and presents a new way of thinking about history s artifacts **The Past Is a**

Foreign Country - Revisited David Lowenthal,2015-10-01 The past remains essential and inescapable A quarter century after the publication of his classic account of man s attitudes to his past David Lowenthal revisits how we celebrate expunge contest and domesticate the past to serve present needs He shows how nostalgia and heritage now pervade every facet of public and popular culture History embraces nature and the cosmos as well as humanity The past is seen and touched and tasted and smelt as well as heard and read about Empathy re enactment memory and commemoration overwhelm traditional history A unified past once certified by experts and reliant on written texts has become a fragmented contested history forged by us all New insights into history and memory bias and objectivity artefacts and monuments identity and authenticity and remorse and contrition make this book once again the essential guide to the past that we inherit reshape and bequeath to the future The affective city Stefano Catucci,Federico De Matteis,2022-01-21 Cities are not made only of stone they

harbor ways of life practices movements moods atmospheres feelings Yet the ineffable nature of affects has long deprived human passions of a meaningful role when it comes to observing urban space and envisioning its future transformation With this book we explore the contemporary city and its transitional conditions from a different perspective a quest to understand how the space of collective life and the feelings this engenders are connected how they mutually give form to each other In an interdisciplinary collection of essays *The Affective City* means to open a discussion on the soft presences animating the world of urban objects beyond the city built out of mere things this book's focus is on the forces that make urban life emerge thrive flourish but also wither and sometimes die A task crucial for the survival of cities as human habitats in an urban world that with every passing day seems to draw closer a crisis

Staub Daniel Gethmann,2013 **Autographic Design**

Dietmar Offenhuber,2023-12-19 An ambitious vision for design based on the premise that data is material not abstract Data analysis and visualization are crucial tools in today's society and digital representations have steadily become the default Yet more and more often we find that citizen scientists environmental activists and forensic amateurs are using analog methods to present evidence of pollution climate change and the spread of disinformation In this illuminating book Dietmar Offenhuber presents a model for these practices a model to make data generation accountable autographic design Autographic refers to the notion that every event inscribes itself in countless ways Think of a sundial for example a perfectly autographic device that displays information on itself Inspired by such post digital practices of visualization and evidence construction Offenhuber describes an approach to visualization based on the premise that data is a material entity rather than an abstract representation Emerson wrote Every act of the man inscribes itself in the memories of his fellows and in his own manners and face In *Autographic Design* Offenhuber introduces a model for design that emphasizes traces imprints and self inscriptions turning them into sensory displays In an age where misinformation is harder and harder to identify *Autographic Design* makes an urgent and persuasive case for a different approach that calls attention to the production of data and its connection to the material world
