**Who Guards the Guardians and How** Thomas C. Bruneau,Scott D. Tollefson,2009-06-03 The continued spread of democracy into the twenty first century has seen two thirds of the almost two hundred independent countries of the world adopting this model In these newer democracies one of the biggest challenges has been to establish the proper balance between the civilian and military sectors A fundamental question of power must be addressed who guards the guardians and how In this volume of essays contributors associated with the Center for Civil Military Relations in Monterey California offer firsthand observations about civil military relations in a broad range of regions including Latin America Africa Asia and Eastern Europe Despite diversity among the consolidating democracies of the world their civil military problems and solutions are similar soldiers and statesmen must achieve a deeper understanding of one another and be motivated to interact in a mutually beneficial way The unifying theme of this collection is the creation and development of the institutions whereby democratically elected civilians achieve and exercise power over those who hold a monopoly on the use of force within a society while ensuring that the state has sufficient and qualified armed forces to defend itself against internal and external aggressors Although these essays address a wide variety of institutions and situations they each stress a necessity for balance between democratic civilian control and military effectiveness

*Salamanca, 1812* Rory Muir,2001-11-10 July 22 1812 Salamanca Spain Frustrated at their first advance British forces under Wellington s command have spent the last four days maneuvering and retreating from the French army Patient and cautious Wellington is determined not to make a fatal mistake He glimpses a moment of opportunity and grasps it committing all of his troops to a sudden devastating attack At the end of the day the French army is broken panic stricken and reeling Wellington has achieved the finest victory of his brilliant military career This book examines in unprecedented detail the battle of Salamanca a critical British victory that proved

crushing to French pride and morale in the Peninsular War 1808-1814. Focusing on the day of the battle, award-winning author Rory Muir conveys the experience of ordinary soldiers on both sides, dissects each phase of the fighting, and explores the crucial decisions each commander made. Muir employs wide-ranging British and French sources, many unpublished or obscure, to reconstruct every aspect of the battle. Having walked the battlefield itself, a site which remains today much as it was in 1812, he relates the ebb and flow of the battle with particular vividness. Muir also discusses in separate commentary sections his sources of information and explains how he has dealt with the inevitable contradictions and gaps in evidence that emerged during his research. Complete with maps, battleground plans, and other illustrations, this compelling book focuses long overdue attention on a single day in Salamanca that changed European history. Rory Muir is visiting research fellow in the department of history, University of Adelaide. His previous books include *Tactics and the Experience of Battle in the Age of Napoleon* and *Britain and the Defeat of Napoleon, 1807-1815*, both published by Yale University Press. **caption Charles Hamilton Smith Ensign with colour 9th foot National Army Museum**

**Military Statecraft and the Rise of Shaping in World Politics** Kyle J. Wolfley, 2021-06-29. Winner of the Andrew F. Krepinevich Writing Award. A 2022 Choice Reviews Outstanding Academic Title. Selected for the Irregular Warfare Initiative's Inaugural Reading List 2022. In today's complex international environment, how do the United States, China, and Russia manage the return of great power competition, as well as the persistent threat of violent non-state actors? This book explores shaping: the use of military power to construct a more favorable environment by influencing the characteristics of other militaries, altering the relationships between them, or managing the behavior of allies. As opposed to traditional strategies of warfighting or coercion, shaping relies less on threats, demonstrations, and uses of violence and more on attraction, persuasion, and legitimacy. Because shaping relies more on soft power than on hard power, this approach contradicts the conventional wisdom of the purpose militaries serve. Kyle J. Wolfley explores the emergence of shaping in classical strategy and its increased frequency following the end of the Cold War, when threats and allies became more ambiguous. He illustrates the four logics of shaping: attraction, socialization, delegation, and assurance, through five case studies of recent major military exercise programs led by the United States, China, India, the United Kingdom, and Russia. Moreover, the author reveals, through sentiment analysis and statistics of over one thousand multinational exercises from 1980 to 2016, how major powers reacted to a complex international environment by expanding the number and scope of shaping exercises. Illuminating an understudied but surprisingly common tool of military statecraft, this book offers a fresh understanding of military power in today's competitive international system.
