many adventures including prehistoric animals and natural hazards before eventually coming to the surface again in southern Italy at the Stromboli volcano. The genre of subterranean fiction already existed long before Verne. However, Journey considerably added to the genre's popularity and influenced later such writings. For example, Edgar Rice Burroughs explicitly acknowledged Verne's influence on his own Pellucidar series. The story begins in May 1863 in the Lidenbrock house in Hamburg, Germany, with Professor Lidenbrock rushing home to peruse his latest purchase, an original runic manuscript of an Icelandic saga written by Snorri Sturluson. Snorre Tarleson, in some versions of the story, Heimskringla, the chronicle of the Norwegian kings who ruled over Iceland. While looking through the book, Lidenbrock and his nephew Axel find a coded note written in runic script along with the name of a 16th-century Icelandic alchemist, Arne Saknussemm. This was a first indication of Verne's love for cryptography. Coded, cryptic, or incomplete messages as a plot device would continue to appear in many of his works, and in each case, Verne would go a long way to explain not only the code used but also the mechanisms used to retrieve the original text. Lidenbrock and Axel transliterate the runic characters into Latin letters, revealing a message written in a seemingly bizarre code. Lidenbrock attempts a decipherment, deducing the message to be a kind of transposition cipher, but his results are as meaningless.

For another, it means going to Iceland to find a certain crater that leads down into a mysterious world. But Professor Lidenbrock is a hard man to ignore. Fuelled by the spirit of adventure,

Here there is a large ocean where Palaeolithic creatures rule undeterred by the passage of time. If these three travellers can return home, this discovery will make them rich and famous beyond their wildest dreams. But then again to do so they will have to find a way out of this world. And so far there doesn't seem to be one.
