Development, Education and Learning in Sri Lanka

Angela W. Little, 2024-06-13. Sri Lanka's early achievements in education and literacy became well known among the international development community in the middle of the last century and were often used to benchmark progress elsewhere. *Development, Education and Learning in Sri Lanka* presents an illuminating narrative of changing education fortunes and inequalities based on half a century of research. This research journey was undertaken in collaboration with Sri Lankan researchers island-wide in myriad communities, schools, classrooms, and education offices through conversations with countless parents, teachers, students, community members, trade union officers, politicians, and members of local, national, and international development agencies as well as through extensive documentary analysis. The book delineates the distinctive and changing features of the Sri Lankan education system through comparisons with systems elsewhere through an understanding of national political, economic, and social conditions, crises, and upheavals through changes in education policy and through shifting patterns of opportunity among diverse social groups. These analyses are framed by themes in the international development discourse ranging from modernisation to basic needs to globalisation and sustainable development, some of which themes have been influenced by the Sri Lankan story. The book's overriding messages are the need to understand education and development in a country's own terms and to place learning at the heart of education policy, situating it within broader conceptions of the purpose, values, and means of development. Praise for *Development, Education and Learning in Sri Lanka*. Through rigorous and comprehensive research and a blend of local and global perspectives, this book offers invaluable insights for academics and policymakers alike. Tara de Mel, Director, Bandaranaike Academy for Leadership and Public Policy, and former Secretary, Sri Lanka Ministry of Education. Reflecting on a career-long engagement with education and development, Angela Little brilliantly co-locates the personal, political, and the theoretical. A privilege to read. Simon McGrath, University of Glasgow. This passionate engagement with education reform and development offers very instructive lessons for academics and policymakers in Sri Lanka and beyond. Siri T. Hettige, University of Colombo. Fifty years

of personal experience in Sri Lanka from many vantage points A focus on education and society rather than education alone And a concern to understand rather than prescribe This book has no competitors Mick Moore Institute of Development Studies Sussex Strategic Journeys for Building Logical Reasoning, 9-12 Tammy Jones, Leslie Texas, 2016-07-07 Help your students develop logical reasoning and critical thinking skills This new book from bestselling authors and popular consultants Tammy Jones and Leslie Texas offers authentic logic building activities and writing strategies that can be used across all subject areas in grades 9 12 Filled with hands on activities and photocopiable tools Strategic Journeys will help you guide your students into deeper thinking to go beyond the surface of content to true understanding Topics include Identifying opportunities for students to engage in meaningful and relevant writing across the content areas Introducing a logical reasoning process questioning structure and bridging models to allow students to delve deeper into problems Incorporating literature to increase student engagement and make content come alive for your students Building vocabulary and literacy skills through fun activities aimed at increasing proficiency Using the Three Phases of Logical Reasoning to plan lessons effectively help students reflect on their progress and implement the strategies successfully The strategies in this book have been implemented in hundreds of classrooms around the country and have been proven to increase student engagement promote higher order thinking and in depth reasoning and improve overall achievement *Handbook of Psychology, Educational Psychology* Irving B.
