**Thinking** David Hardman, Laura Macchi, 2004-01-09 The first international handbook to bring the areas of reasoning judgment and decision making together now in paperback format The book brings three of the important topics of thinking together reasoning judgment and decision making and discusses key issues in each area The studies described range from those that are purely laboratory based to those that involve experts making real world judgments in areas such as medical and legal decision making and political and economic forecasting International collection of original chapters by leading researchers in the field Several chapters contain important new theoretical perspectives Paperback version is more affordable for individual researchers

*Judgment and Decision Making at Work* Scott Highhouse, Reeshad S. Dalal, Eduardo Salas, 2013-09-05 Employees are constantly making decisions and judgments that have the potential to affect themselves their families their work organizations and on some occasion even the broader societies in which they live A few examples include deciding which job applicant to hire setting a production goal judging one's level of job satisfaction deciding to steal from the cash register agreeing to help organize the company's holiday party forecasting corporate tax rates two years later deciding to report a coworker for sexual harassment and predicting the level of risk inherent in a new business venture In other words a great many topics of interest to organizational researchers ultimately reduce to decisions made by employees Yet numerous entreaties notwithstanding industrial and organizational psychologists typically have not incorporated a judgment and decision making perspective in their research The current book begins to remedy the situation by facilitating cross pollination between the disciplines of organizational psychology and decision

making The book describes both laboratory and more naturalistic field research on judgment and decision making and applies it to core topics of interest to industrial and organizational psychologists performance appraisal employee selection individual differences goals leadership teams and stress among others The book also suggests ways in which industrial and organizational psychology research can benefit the discipline of judgment and decision making The authors of the chapters in this book conduct research at the intersection of organizational psychology and decision making and consequently are uniquely positioned to bridging the divide between the two disciplines

Perspectives on Thinking, Judging and Decision Making Karl Halvor Teigen, 2011 This book gives insights into the most recent developments in research on judgement and decision making It contains contributions from some of the best known experts in this broad field The book is written for a wide audience and is of interest for anyone who wants to understand and improve his or her ability to make appropriate judgements and decisions The different chapters cover a great variety of topics related to probability judgements and risk perception cognitive and emotional processes underlying judgement and the pragmatics of choice behaviour along with related aspects of social cognition The different chapters written by researchers from many countries and from different domains including psychology linguistics business administration and marketing reflect the multi disciplinary character of the book

**Judgment and Decision Making** Peter Juslin, Henry Montgomery, 2007-09-26 Research on human judgment and decision making has been strongly guided by a normative descriptive approach according to which human decision making is compared to the normative models provided by decision theory statistics and the probability calculus A common empirical finding has been that human behavior deviates from the prescriptions by normative models that judgments and decisions are subject to cognitive biases It is interesting to note that Swedish research on judgment and decision making made an early

departure from this dominating mainstream tradition albeit in two different ways The Neo Brunswikian research highlights the relationship between the laboratory task and the adaptation to a natural environment The process tracing approach attempts to identify the cognitive processes before during and after a decision This volume summarizes current Swedish research on judgment and decision making covering topics such as dynamic decision making confidence research the search for dominance structures and differentiation and social decision making

**Psychological Perspectives on Ethical Behavior and Decision Making** David DeCremer, 2009-08-01 The book is divided into three relatively coherent sections that focus on understanding the emergence of un ethical decisions and behaviors in our work and social lives by adopting a psychological framework The first section focuses on reviewing our knowledge with respect to the specific notions of ethical behavior and corruption These chapters aim to provide definitions boundary conditions and suggestions for future research on these notions The second section focuses on the intra individual processes affect cognition and motivation that determine why and how people display unethical behavior and are able to justify this kind of behavior to a certain extent In these chapters the common theme is that given specific circumstances psychological processes are activated that bias perceptions of ethical behavior and decision making The third section explores how organizational features frame the organizational setting and climate These chapters focus on how employment of sanctions procedurally fair leadership and a general code of conduct shapes perceptions of the organizational climate in ways that it becomes clear to organizational members how just moral and retributive the organization will be in case of unethical behavior

**Diagnosis** Pat Croskerry, Karen Cosby, Mark L. Graber, Hardeep Singh, 2017-09-19 Despite diagnosis being the key feature of a physician s clinical performance this is the first book that deals specifically with the topic In recent years however considerable interest has been shown in this area and significant developments have occurred in two main areas a an awareness and increasing understanding of the critical role of clinical decision making in the process of diagnosis and of the multiple factors that impact it and b a similar appreciation of the role of the healthcare system in supporting clinicians in their efforts to make accurate diagnoses Although medicine has seen major gains in knowledge and technology over the last few decades there is a consensus that the diagnostic failure rate remains in the order of 10 15% This book provides an overview of the major issues in this area in particular focusing on where the diagnostic process fails and where improvements might be made
