Schmidt,2006-01-01 What were the guiding themes of the discipline of International Relations before World War II The traditional disciplinary history has long viewed this time period as one guided by idealism and then challenged by realism This book reconstructs in detail some of the formative episodes of the field s early development and arrives at the conclusion that in actuality the early years of International Relations were preoccupied not with idealism and realism but with the dual themes of imperialism and internationalism Thus the beginnings of the discipline have resonance with the recently revived discourse of empire and the global status and policies of the United States as the world s sole superpower

The Industrial Revolution James Wolfe,2015-07-15 The Industrial Revolution has had the most far reaching and transformative effects of any era in the planet s history After detailing life and technology in Europe prior to the revolution this volume presents the changes that led to the revolution important inventions and innovations societal and economic consequences and the Second Industrial Revolution in the United States Readers will learn how inventions we take for granted today such as the telephone steam engine and railroad transformed our world and started us on the path to globalization **Asian Forms of the Nation** Stein Tonnesson,Hans Antlov,2013-10-23 The general tendency among

theorists in nationalism and national identity has been to assume that the modernization process in Asia and Africa is a kind of distorted reflection of a Western precedent Asian forms of the nation have rarely been seen as independent alternative models Among today s leading theoreticians there is a growing tendency to take Asia seriously and to include Asian examples in the general discussion The aim of the present collection is to build on and reinforce this tendency It does not postulate any specifically Asian form of the nation as opposed to a Western one Rather it seeks to demonstrate that in Asia as well as in Europe each nation forms a unique amalgam which can be compared fruitfully with others History culture and geography have posed various kinds of limits to what can be imagined as Benedict Anderson puts it The relationship between geographical space and national construction is explored in depth here
