

Design Guide

INTRODUCTION

The Infinity Zoning System provides the ability to control 2, 4, or 8 zones in a residential or light commercial application. Each controlled zone should support the minimum airflow of the equipment selected. Consult the product data to determine minimum airflow requirements.

The Infinity Zoning System can only be used with variable speed furnaces, such as the 50MVB, 50dMVC, or 58CVA, or with the FE fan coil. To achieve the best operating and comfort it is recommended that the two stage compressor units, such as the 24ANA1, 24ANA6, 258HNA6 or the 25HNA9 be selected in the design of the zoning system. The multiple stage compressing units provide some leeway in the system minimum airflow requirements.

Infinity Zoning incorporates cutting edge technology that sets it apart from any other zoning system on the market today. It contains all the features of Comfort Zone II plus many improvements which make it the easiest system on the market to install and use with confidence:

- It does not require a bypass damper or leaving air temperature sensor, yet the BTUAC equipment is always protected from limit trips and coil freezing.
- It does not require a separate field installed power transformer.
- System can handle up to five dampers per zone.
- Infinity Zoning automatically identifies all communicating installed equipment.
- Patented Automatic Duct Assessment means that Infinity Zoning delivers superior and quiet comfort with any reasonable duct system.
- All temperature sensors and dampers include the same as Comfort Zone II. All other components are new and are not interchangeable with CZII.

ZONING	DESCRIPTION	
58TXXCZ001	Infinity Zone Control	Zoning
58TXXCZM501	Smart Sensor	Zoning
58TXXCZ0001	Damper Control Module	Zoning
58TXXCZ0501	Remote Room Sensor	RPS

INFINITY SYSTEM COMPONENTS

The Infinity System uses a serial communication bus to pass information between major system components. 24 vac control signals are gone (with the exception of driving dampers and conventional outdoor units). This means that Infinity Zoning will use Infinity compatible components only. A system will consist of:

- An Infinity furnace or fan coil (58MVB, 58dMVC, FE4 fan coil)
- An Infinity or new Performance Series AC or HP
- Hybrid Heat – Infinity furnace with Infinity or new Performance Series HP
- Infinity furnace with conventional single stage AC or FE fan coil with conventional AC or HP
- An Infinity Zoning User Interface (58TXXCZU001)
- One or two Infinity Damper Control Modules (58TXXCZ0001)
- Remote Room Sensors (58TXXCZ0501) or Smart Sensors (58TXXCZM501)
- Modulating dampers (DAMPREC, DAMPREND, DAMPSL)

Following is a brief description of each of these components.

Carrier Infinity Variable Speed 80 or 90% furnace or FE fan coil

The Infinity System is a fully communicating control system. Only series 17B and later 90% Carrier variable speed furnaces, 80% 58CVA or FE fan coils are acceptable indoor units that work with the Infinity System. Communication takes place over a four wire ABCD communication bus.

The Infinity FE fan coils will operate with any Infinity or new Performance AC or HP or any conventional single stage AC or HP. The Infinity Furnaces will operate with any Infinity, or Performance AC or HP or any conventional single stage AC.

Infinity Zoning User Interface

If the variable speed furnace or fan coil could be considered the heart of the system then the Zoning User Interface must be considered the brain. It is the user access into the Infinity Zone System. It allows the user to operate, program, setup, monitor, and troubleshoot the system.

A Guide to Planning for Community Character Lane H. Kendig, 2012-09-26 A Guide to Planning for Community Character adds a wealth of practical applications to the framework that Lane Kendig describes in his previous book Community Character The purpose of the earlier book is to give citizens and planners a systematic way of thinking about the attributes of their communities and a common language to use for planning and zoning in a consistent and reliable way This follow up volume addresses actual design in the three general classes of communities in Kendig s framework urban suburban and rural The author s practical approaches enable designers to create communities with the character that citizens actually want Kendig also provides a guide for incorporating community character into a comprehensive plan In addition this book shows how to use community character in planning and zoning as a way of making communities more sustainable All examples in the volume are designed to meet real world challenges They show how to design a community so that the desired character is actually achieved in the built result The book also provides useful tools for analyzing or measuring relevant design features Together the books provide a comprehensive treatment of community character offering both a tested theory of planning based on visual and physical character and practical ways to plan and measure communities The strength of this comprehensive approach is that it is ultimately less rigid and more adaptable than many recent flexible zoning codes
