Inequality - the unbeatable challenge Medani P. Bhandari,Shvindina Hanna,2022-09-01 This edited book presents some unexplored issues of economic inequality including case studies of various countries Inequality is a chronic and divisive factor of society Inequality exists as an integral attribute of human development Communities nations and systems are not evolving at the same speed and rate and thus require different resources in different amounts However the distribution of winnings is also uneven due to the multidimensionality of influencing factors When we talk about inequality it is not just inequality of income or wealth it is first inequality in access to priorities and human needs to shelter to clean water air health care and also to appropriate vaccination systems and assistance security systems and safety guarantees for the future Past financial crises and the current pandemic shock has revealed bugs in the system shaking it and changing our perception of the norms We

may have no doubts that inequality is an unsolved problem but now we need to find out is it unbeatable There is still lack of knowledge around how inequality has been grounded throughout human civilization why society is stratified and classified economically politically socially and religiously and why the discrimination due to gender sexual orientation country of origin language differences immigration status caste race and ethnicity This book addresses these issues in a holistic way as well as including case studies of various countries It tries to find out why inequality has been unbeatable and what would be the best policies to overcome this challenge *Reducing Inequalities Towards Sustainable Development Goals* Medani P.

Bhandari,2022-09-01 The Sustainable Development Goals SDGs are a set of global goals that meet some of the most pressing challenges facing our world today Goal 10 concerns reducing global inequalities Inequality is currently seen in the social political and economic structures of communities at both the national and international level The United Nations approach to sustainable development is to create a set of goals and targets try to minimize the accelerating gaps of inequality The book presents new insights for evaluating the progress on SDGs especially goal 10 it also boldly sets new economic social and environmental targets for reducing inequality Using case studies this book encourages readers to view economic development through the lens of growing inequalities and disparities Such inequalities are clearly becoming more obvious as the world is better connected and information is quickly shared The books main aim is therefore to direct the efforts of scholars practitioners and policymakers to swiftly find the balance between the three pillars of sustainable development The main challenges and focus of each chapter are different and collectively they give an integrated understanding of the phenomenon of sustainable development and its diverse aspects This book will be useful for policymakers social and environmental activists agencies educators and practitioners in the sphere of social or environmental economics The methodology of the research can be replicated and taken forward by future researchers in the field *Duality by Design*

Building Global Infrastructure Dale S.

Rothman,Mohammad T. Irfan,Barry B. Hughes,Eli Margolese-Malin,Jonathan D. Moyer,2015-12-03 Building Global Infrastructure is the fourth in a series of volumes Patterns of Potential Human Progress that uses the International Futures IFs simulation model to explore prospects for human development how development appears to be unfolding globally and locally how we would like it to evolve and how better to assure that we move it in desired directions Earlier volumes addressed the reduction of global poverty the advance of global education and the improvement of global health Volume 4 sets out to tell the story of the future of global infrastructure The approach used in this book focuses on the question of

whether individual societies will be able to meet future infrastructure demands Related questions include the following What is the range of realistically conceivable futures for infrastructure considering both demand and supply How are the demands for infrastructure balanced with the ability to meet these demands thereby linking the physical and financial treatment of infrastructure What are the effects of providing for infrastructure on issues such as economic productivity and health The Infrastructured State Colin Turner,2020-02-28 At the core of the logic of this book is that states engage in infrastructuring as a means of securing and enhancing their territoriality By positioning infrastructure as a system there is a presumption that all infrastructures exhibit some degree of mutual dependence As such a National Infrastructure System NIS is not simply about conventional conceptions of infrastructure based on those that support economic activity i e energy transport and information but also about broader hard and soft structures that both enable and are supported by the aforementioned economic infrastructures Consequently this book offers an ambitious holistic view on the form of NIS arguing that the infrastructural mandate requires a conception of the state that encapsulates themes from both the competition and the welfare states in infrastructure provision
