Scientific and Technical Aerospace Reports ,1994 World Congress on Medical Physics and Biomedical Engineering
September 7 - 12, 2009 Munich, Germany Olaf Dössel, Wolfgang C. Schlegel, 2010-01-04 Present Your Research to the World
The World Congress 2009 on Medical Physics and Biomedical Engineering the triennial scientific meeting of the IUPESM is
the world's leading forum for presenting the results of current scientific work in health related physics and technologies to
an international audience With more than 2 800 presentations it will be the biggest conference in the fields of Medical
Physics and Biomedical Engineering in 2009 Medical physics biomedical engineering and bioengineering have been driving
forces of innovation and progress in medicine and healthcare over the past two decades As new key technologies arise with
significant potential to open new options in diagnostics and therapeutics it is a multidisciplinary task to evaluate their benefit
for medicine and healthcare with respect to the quality of performance and therapeutic output Covering key aspects such as
information and communication technologies micro and nanosystems optics and biotechnology the congress will serve as an
inter and multidisciplinary platform that brings together people from basic research R D industry and medical application to
discuss these issues As a major event for science medicine and technology the congress provides a comprehensive overview
and in depth first hand information on new developments advanced technologies and current and future applications With
this Final Program we would like to give you an overview of the dimension of the congress and invite you to join us in Munich

Leveraging Technology for a Sustainable World David A. Dornfeld, Barbara S. Linke, 2012-04-23 The 19th CIRP
Conference on Life Cycle Engineering continues a strong tradition of scientific meetings in the areas of sustainability and
engineering within the community of the International Academy for Production Engineering CIRP The focus of the
conference is to review and discuss the current developments technology improvements and future research directions that
will allow engineers to help create green businesses and industries that are both socially responsible and economically
successful The symposium covers a variety of relevant topics within life cycle engineering including Businesses and

Glocalized Solutions for Sustainability in Manufacturing Jürgen Hesselbach, Christoph Herrmann, 2011-03-19 The 18th CIRP International Conference on Life Cycle Engineering LCE 2011 continues a long tradition of scientific meetings focusing on the exchange of industrial and academic knowledge and experiences in life cycle assessment product development sustainable manufacturing and end of life management The theme Glocalized Solutions for Sustainability in Manufacturing addresses the need for engineers to develop solutions which have the potential to address global challenges by providing products services and processes taking into account local capabilities and constraints to achieve an economically socially and environmentally sustainable society in a global perspective Glocalized Solutions for Sustainability in Manufacturing do not only involve products or services that are changed for a local market by simple substitution or the omitting of functions Products and services need to be addressed that ensure a high standard of living everywhere Resources required for manufacturing and use of such products are limited and not evenly distributed in the world Locally available resources local capabilities as well as local constraints have to be drivers for product and process innovations with respect to the entire life cycle The 18th CIRP International Conference on Life Cycle Engineering LCE 2011 serves as a platform for the discussion of the resulting challenges and the collaborative development of new scientific ideas Burrs - Analysis, Control and Removal Jan C. Aurich, David A. Dornfeld, 2009-12-01 In many machining operations burrs cannot be avoided They can affect the functionality and the safe handling of the workpiece in the subsequent processing and have to be removed by a special deburring process Toleration of burrs which are not part of functional edges depends on their respective shape and size High inspection effort is necessary to guarantee the workpiece quality Therefore the research results on burrs with a focus on burr analysis and control as well as on cleanability and burr removal based on the presentations held at the conference are valuable for researchers and engineers in manufacturing development **Optical Engineering** ,2000 Publishes papers reporting on research and development in optical science and engineering and the practical applications of known optical science engineering and technology International Aerospace Abstracts ,1995 **Buildings Energy Conservation** ,1985-08 Powtech '83 Particle Technology Sam Stuart, 2013-10-22 Powtech 83 Particle Technology focuses on the techniques and processes involved in the handling and processing of powders and other related products The book presents studies that show the composition characteristics value and strength of materials when subjected to different conditions in different environments Divided into five parts with 32 chapters the book features the work of contributors who have conducted research on the composition and chemical processes involved in particle technology The pieces that are presented feature experiments and tests conducted on different materials such as coal and liquids These experiments are

supported by lengthy discussions coupled with numerical representation to validate the claims of authors in their respective concerns. Although the authors have their own topics to cover, they will manage to capture the interest of physicists, chemists, and mechanical and civil engineers who are interested in particle technology. Taking into consideration the value of information presented in the book, these professionals will find the book a reliable source of data in their profession and in their studies.

Government Reports Announcements & Index ,1991 Functional Thinking for Value Creation Jürgen Hesselbach, Christoph Herrmann, 2011-03-18

After the IPS2 conferences in Cranfield and Linköping in 2009 and 2010, the 3rd CIRP International Conference on Industrial Product Service Systems (IPS2 2011) takes place in Braunschweig, Germany. IPS2 itself is defined as an integrated industrial product and service offering that delivers value in use. The customers expect comprehensive solutions which are adapted to their individual needs. IPS2 offers the possibility to stand out from competition and for long-term customer loyalty. Particularly in times of economic crisis, it becomes apparent which producing companies understand to satisfy the needs and requirements of their customers. Especially in this relatively new domain, IPS2 it will be important to keep track of the whole context and to seek cooperation with other research fields and disciplines. The 3rd CIRP International Conference on Industrial Product Service Systems (IPS2 2011) serves as a platform for such collaborations and the discussion of new scientific ideas.
