Information Resources Management Association. International Conference,2001 Today opportunities and challenges of available technology can be utilized as strategic and tactical resources for your organization Conversely failure to be current on the latest trends and issues of IT can lead to ineffective and inefficient management of IT resources **Managing Information Technology in a Global Economy** is a valuable collection of papers that presents IT management perspectives from professionals around the world The papers introduce new ideas refine old ones and possess interesting scenarios to help the reader develop company sensitive management strategies **The Concept of Enterprise Architecture from Theory to Practice** Tiko Iyamu,2023-12-06 Even though the field of enterprise architecture EA has matured many organisations still struggle with its development and implementation particularly those organisations involved in continuous transformational cycles and subjected to different environmental trends This book is intended to assist organisations in getting a grip on the factors influencing EA implementation and gaining a deeper understanding of why things happen the way they do in the practice of EA It is a comprehensive and definitive resource that is useful to both business professionals and academics The book presents an approach for the development implementation or institutionalisation of EA that is independent of any method or other architecture frameworks It can be applied directly using a realistic selection of organizational variables The approach has two distinctive features that support EA even in complex environments From both technical and non technical perspectives it identifies influencing factors and how they manifest in the practice of EA in an organization It offers linear and practical mechanisms for developing and implementing EA to fortify the practice of the concept in an organisation This approach represents a significant contribution to EA Starting with descriptions for EA the book offers deepened models and frameworks for the development and implementation of EA at the domain level It also covers factors upon which a model is built for the institutionalisation of the concept Additionally the book discusses the implications of EA for sponsors architects and other stakeholders responsible for EA development implementation and institutionalisation **Strategic**

Organizational Diagnosis and Design Richard M. Burton, Borge Obel, 2013-12-01 There are two very contrasting approaches to reading this book and learning about organizational design. The more traditional approach is to read the book and then use the OrgCon on cases and applications. The second approach is to begin with the OrgCon software and only examine the book as you find it helpful. Which approach is better? It is your choice, not ours. In our experience, students in organizational design prefer to start with the OrgCon and a case rather than with the book itself. Readers who have more background in organization theory and design usually examine the book first. There are numerous changes in the third edition. The literature review in each chapter has been updated. The information processing approach is strengthened and applied more comprehensively as the theoretical underpinnings. Throughout, we have rewritten the text beyond normal editing in an attempt to make the presentation clearer and easier to read.

Health Informatics - E-Book Ramona Nelson, Nancy Stagg, 2016-12-08 Awarded second place in the 2017 AJN Book of the Year Awards in the Information Technology category. See how information technology intersects with health care. Health Informatics: An Interprofessional Approach, 2nd Edition, prepares you for success in today's technology-filled healthcare practice. Concise coverage includes information systems and applications such as electronic health records, clinical decision support, telehealth, ePatients, and social media tools, as well as system implementation. New to this edition are topics including data science and analytics, mHealth, principles of project management, and contract negotiations. Written by expert informatics educators Ramona Nelson and Nancy Stagg, this edition enhances the book that won a 2013 American Journal of Nursing Book of the Year award. Experts from a wide range of health disciplines cover the latest on the interprofessional aspects of informatics, a key Quality and Safety Education for Nurses (QSEN) initiative and a growing specialty area in nursing. Case studies encourage higher-level thinking about how concepts apply to real-world nursing practice. Discussion questions challenge you to think critically and to visualize the future of health informatics. Objectives, key terms, and an abstract at the beginning of each chapter provide an overview of what you will learn. Conclusion and Future Directions section at the end of each chapter describes how informatics will continue to evolve as healthcare moves to an interprofessional foundation. NEW! Updated chapters reflect the current and evolving practice of health informatics using real-life healthcare examples to show how informatics applies to a wide range of topics and issues. NEW! mHealth chapter discusses the use of mobile technology, a new method of health delivery especially for urban or underserved populations, and describes the changing levels of responsibility for both patients and providers. NEW! Data Science and Analytics in Healthcare chapter shows how Big Data, as well as analytics using data mining and knowledge discovery techniques, applies to healthcare. NEW! Project Management Principles chapter discusses proven project management tools and techniques for coordinating all types of health informatics-related projects. NEW! Contract Negotiations chapter describes strategic methods and tips for negotiating a contract with a healthcare IT vendor. NEW! Legal Issues chapter explains how federal regulations and accreditation processes may impact the practice of health informatics.

NEW HITECH Act chapter explains the regulations relating to health informatics in the Health Information Technology for Education and Clinical Health Act as well as the Meaningful Use and Medicare Access CHIP Reauthorization Act of 2015
