Receiving and Handling

Inspection

Upon receipt of the equipment, immediately inspect for damage that may have occurred during transit. Any damage claims are to be filed with the carrier and reported to Powersmiths expeditiously with serial number information and carrier details.

Storage

Store Transformers in a dry and clean location protected from the elements and also ensure that the ventilation openings remain covered to prevent the entry of moisture or dust. No special precautions are required for temperature extremes in the range of -40°C to $+70^{\circ}\text{C}$ but it should be protected from rapid temperature changes to avoid moisture condensation.

Handling

CAUTION

Transformers can be very heavy with a relatively high center of gravity, handle with care and move slowly to avoid tipping

Lift only by a forklift or pallet truck on the bottom of the transformer case (see moving & handling) or by overhead crane using the internal lifting eyes attached on the top frame of the core & coil assembly while ensuring even distribution of the load

Do not allow the transformer to tip on its side which may permanently damage it beyond repair

Powersmiths Transformers are normally shipped using Powersmiths "Easy Skid" which is designed to minimize the use of shipping materials, maximize shipping efficiency and facilitate easy moving and safer installation. The transformers are also equipped with internal lifting eyes to facilitate overhead crane lifting; to access remove case covers and top.
