Before you start using your new phone you may need:

- **Insert SIM card.** To take full advantage of your new smartphone's capabilities, you should install a SIM card. The SIM card will enable you to place calls or use mobile data to connect to various internet services. Your mobile service provider will give you a card and the codes needed for it (PIN and PUK) when you buy a mobile contract or a prepaid SIM card. Make sure you get a suitable contract that fit your needs regarding calls and mobile data.
- **Memory card (optional).** You can use a memory card (MicroSD) to increase the storage space of your phone to be able to store more files, pictures, videos etc. Insert a memory card, reboot your device and follow the instruction to select how to use your memory card. We suggest you to use a high speed memory card.

2. Place the SIM card into the correct tray slot to ensure that it can be recognized by the phone.

Make sure that the SIM card's contacts are facing downwards and that the cut-off corner is down, as shown. Take care not to scratch or bend the contacts on the SIM card.

Karl Popper, Science and Enlightenment Nicholas Maxwell, 2017-09-26 Here is an idea that just might save the world It is that science properly understood provides us with the methodological key to the

salvation of humanity A version of this idea can be found in the works of Karl Popper Famously Popper argued that science cannot verify theories but can only refute them and this is how science makes progress Scientists are forced to think up something better and it is this according to Popper that drives science forward But Nicholas Maxwell finds a flaw in this line of argument Physicists only ever accept theories that are unified theories that depict the same laws applying to the range of phenomena to which the theory applies even though many other empirically more successful disunified theories are always available This means that science makes a questionable assumption about the universe namely that all disunified theories are false Without some such presupposition as this the whole empirical method of science breaks down By proposing a new conception of scientific methodology which can be applied to all worthwhile human endeavours with problematic aims Maxwell argues for a revolution in academic inquiry to help humanity make progress towards a better more civilized and enlightened world
