environment It explores how the complexity of the operational environment impacts on the risk of operations and addresses a need for tailor made emergency response mechanisms Through case studies of the arctic environment the book illustrates how factors such as nature geography demographics and infrastructure increase the complexity of crises in the Arctic and present a significant danger to life and health the environment and values in challenging Arctic waters The case studies lay a special focus on contextual factors including conflicting interests and different stakeholder groups as well as the institutional platforms influencing crisis response and emergency management They also explore the implications for the managerial roles the mode of operations and the structuring of the organizations responsible for the emergency response The necessity to facilitate cooperation across organizations and borders and a need for organizational flexibility in large scale operations are also emphasized Written in an accessible style this book will make for a useful resource for undergraduate and postgraduate students of disaster and emergency management as well as for professionals involved in emergency services

How to Grow a Navy Geoffrey Till, 2022-09-02 This book examines the large but neglected topic of the development of maritime power from both an historical and a contemporary point of view Navies have never been more important than they are now in a century becoming as widely expected increasingly and profoundly maritime The growing competition between China and Russia with the United States and its allies and partners around the world is essentially sea based The sea is also central to the world's globalised trading system and to its environmental health Most current crises are either sea based or have a critical maritime element to them What happens at sea will help shape our future Against that background this book uses both history and contemporary events to analyse how maritime power and naval strength has been and is being developed In a reader friendly way it seeks to show what has worked and what has not and to uncover the recurring patterns in maritime and naval development which explain past present and future success and failure It reflects on the historical experience of all navies but in particular it poses the question of whether China is following the same pattern of naval development illustrated by Britain at the start of the 18th century which led to two centuries of naval dominance This book will be of much interest to students of maritime power naval studies and strategic studies as well as to naval professionals around the world
