Migrating from Microsoft SQL Server to IBM Informix Whei-Jen Chen,Chee Fong Koh,Deen Murad,Holger Kirstein,Rakeshkumar Naik,IBM Redbooks,2010-07-22 In this IBM Redbooks publication we discuss considerations and describe a methodology for transitioning from Microsoft SQL Server 2008 to the Informix Dynamic Server We focus on the topic areas of data applications and administration providing information about the differences in features and functionality including the data types data manipulation language data definition language and stored procedures Understanding the features and functionality of the two products assists you in developing a migration plan We provide a conversion methodology and discuss the processes for migrating the database objects and data from SQL Server to Informix using various methods We show the SQL differences between SQL Server and Informix and illustrate with examples how to convert tables views stored procedures functions and triggers We provide script conversion samples for data loading We describe application programming and conversion considerations In addition we discuss the Informix configuration as well as the administration features and functions Informix provides to help DBAs manage the Informix database server after it is migrated With this information you can develop your required transition methodology and you can plan and execute the conversion activities in an orderly and cost effective manner

Embedding IBM Informix Whei-Jen Chen,Oluwatosin Ajayi,Mirav Kapadia,Alexander Koerner,Jacques Roy,Dick Snoke,IBM Redbooks,2011-02-17 In this IBM Redbooks publication we discuss and describe the capabilities for embedding Informix into applications and software We introduce the technological architecture and describe several of the functions and features that support Informix as a robust and powerful embeddable DBMS Many of these features are unique in the industry today enabling clients to create a business advantage

The Informix database server can support the requirements of an embeddable DBMS and is doing so for many companies today. The low administration requirements of the Informix database server enable clients to deploy thousands of Informix instances embedded in applications in locations where there are no technical resources to support the database. The real requirement is for applications with embedded databases that require little or no administration. Informix database servers have excellent performance and are highly reliable. As a mature and reliable DBMS, the Informix database server works well with small, growing, and large databases and meets the key requirements for embedded databases, which include the ability to execute without needing any configuration or other DBA administrative activities and the flexibility to work on all of the platforms commonly used in the marketplace today.

This book will help DBAs and programmers improve the performance of their databases.

Database Schema Evolution and Meta-Modeling Herman Balsters, Bert de Brock, Stefan Conrad, 2003-06-29. The Ninth International Workshop on Foundations of Models and Languages for Data and Objects (FoMLaDO) took place in Dagstuhl, Germany, Sept. 18-21, 2000. The topic of this workshop was Database schema Evolution and Meta Modeling. This FoMLaDO Workshop was hence assigned the acronym DEMM 2000. These post-proceedings contain the revised versions of the accepted papers of the DEMM 2000 workshop. Twelve regular papers were accepted for inclusion in the proceedings. The papers address the following issues: Consistency of evolving concurrent information systems, Adaptive specifications of technical

information systems Change propagation in schema evolution of object based systems Evolving software of a schema evolution system Logical characterization of schema evolution Con ict management in integrated databases Evolving relation schemas Conceptual descriptions of adaptive information systems OQL extensions for metadata access Metamodeling of schema evolution Metrics for conceptual schema evolution Incremental datawarehouse construction In addition to the regular papers there is an invited paper by Can Turk er on schema evolution in SQL99 and object relational databases Acknowledgements We wish to thank the program committee members for their work on reviewing the submitted papers We also wish to thank all a hors for submitting papers to this workshop Moreover all participants of the workshop are thanked for contributing to lively discussions Thanks also to Elke Rundensteiner who delivered an invited talk on the SERF project concerning exible database transformations
