Icaew Study Manual Far:

The Accountant, 1983 *Accountancy*, 1989 **Understanding Assessment** David Lambert, David Lines, 2013-04-15
This is the first title in this new series which is aimed principally at secondary PGCE and BAEd students and school and HEI based tutors. Each book provides a digest of the central issues around a particular topic or issues grounded in or supported by examples of good practice with suggestions for further reading, study and investigation. The books are not intended as how-to books but rather as books which will help students and teachers to explore and understand critical theoretical issues in ways that are challenging that invite critical reappraisals of taken-for-granted practices and perceptions and that provide appropriate links between theory and practice. Issues related to equal opportunities and special needs are included in each separate volume. There are boxes of questions, think abouts, further reading and bulleted summary lists for the reader. This book is written specifically for teachers in training which will clarify the big picture of monitoring and assessment and makes the crucial distinctions in this large and still taken-for-granted field. The authors have written widely on assessment matters and have also worked in various capacities for the QCA and its former manifestations. They are also engaged in initial teacher education and so know the level and market extremely well.

Teaching IFRS Richard M.S. Wilson, Ralph W. Adler, 2013-09-13
The increasing pace of global conformance towards the adoption of International Financial Reporting Standards (IFRS) highlights the need for accounting students as well as accounting practitioners to be conversant with IFRS. Teaching IFRS offers expert descriptions of and insights into the IFRS convergence process from a teaching and learning perspective. Hence this book is both timely and likely to have considerable impact in providing guidance for those who teach financial reporting around the world. The contents of the book come from authoritative sources and offer something distinctive to complement the existing textbooks which typically focus on the technical aspects of IFRS and their adoption. Drawing upon the experiences of those who have sought to introduce IFRS-related classroom innovations and the associated student outcomes achieved therefrom, the book offers suggestions about how to design and deliver courses dealing with IFRS and catalogues extensive listings of IFRS-related teaching resources to support those courses. This book was originally published as a special issue of *Accounting Education: An International Journal*.

Fundamentals of Investment Appraisal Stephen Lumby, Steve Lumby, Chris Jones, 2001
This new short text by the authors of *Investment Appraisal and Financial Decisions* focuses on investment appraisal decisions. *Fundamentals of Investment Appraisal* examines the internal workings of a company rather than covering the much broader subject of financial management. Theory is illustrated with numerous worked examples followed by a chapter summary, quick questions (all answered at the end of the book) and more detailed practice questions.

Macroeconomic Risk and Growth in the Southeast Asian Countries William A. Barnett, Bruno S. Sergi, 2023-11-09
