Scott, 2022-07-12 Aerospace Law and Policy Series Volume 11 In recent years few industries have grown so prodigiously as that of unmanned aircraft systems UAS and as a result developments in national regional and international law and policy are being initiated and implemented This new edition of the definitive survey and guide first published in 2016 reflects the expansion of this sector and the importance placed on it by a diverse range of stakeholders as well as the enlarged regulatory and policy landscape In addition to updating many of the original chapters the second edition covers new topics and moves away from a purely introductory book to a more detailed and critical compendium Authorship has also been extended beyond the original scope of contributors which originally centred around those affiliated with Leiden University's Institute of Air and Space Law and now includes additional experts from all around the world each of whom explores both already existing rules and proposals coming from national regional and international levels As well as broadened discussions on such fundamental legal issues as insurance financing liability accidents investigation privacy cyber security stakeholder organisations and industry standards the second edition takes into account major recent developments in such areas as the following applicability and relevance of international regulatory instruments coming into force of the European Union UAS related laws evolution of different States national law public safety e g design production operation and maintenance development of unmanned traffic management systems commercial operations including urban air mobility e g flying taxis cargo delivery high altitude activities and developments in defence and security e g dual use counter UAS industry to combat illegal use As in the first edition a representative cross section of national laws is included covering twenty one different jurisdictions This fully updated edition not only synthesises and clarifies the complex body of international regional and national UAS related law but also provides expert insight into trends and areas of concern for numerous stakeholders Without a doubt it will be of immeasurable value to lawyers relevant governmental and non

governmental agencies aviation law scholars and strategic planners in the wider aviation and transport industries Legal and Regulatory Issues in International Aviation Ruwantissa I.R. Abeyratne, 2023-07-03 Air law has recently grown in significance Drawing on international and national instruments and a wealth of case law from many jurisdictions including the International Court of Justice this book covers the role of international law in such matters as legal consequences arising from the use of automation in civil aviation the carriage of the elderly and disabled by air unlawful interference with civil aviation protection of the environment and the legal management of aviation security Published under the Transnational Publishers imprint Air Transport Security Joseph S. Szyliowicz, Luca Zamparini, 2018-08-31 The growing number of terrorist attacks throughout the world continues to turn the interest of scholars and governments towards security issues As part of the Comparative Perspectives on Transportation Security series this book provides a multidisciplinary analysis of the security challenges confronting air transportation The first part encompasses the industry s characteristics and the policy economic and regulatory issues shaping the security environment The second provides a comparative analysis of security policies and practices in several key countries **Aviation Security** Ruwantissa I.R. Abeyratne, 2018-12-13 Published in 1998 The various conventions which apply to the subject of unlawful interface with civil aviation have proved effective only to the extent of nurturing existing values of international law as they are restrictively perceived through the parameters of air law This book examines the offence of unlawful interference with international civil aviation and analyses critically the legal and regulatory regime that applies thereto with a view to recommending measures that are calculated to infuse a new approach to the problem Emphasis is laid throughout the work on action which may be taken to alleviate the problem of unlawful interference Its conclusion incorporates various steps that can be taken towards achieving this objective The author focuses on the core of the problem which has effectively precluded significant progress into inroads that would curb the threat terrorism in aviation the attitude of the international community The book therefore examines in limine the fundamental role of international law in the light of the United Nations Congress of International Public Law of March 1995 and its effect on international criminal law It then determines the applicable principles of State sovereignty and examines the principles of State responsibility Its main purpose is to recommend the establishment of a new philosophy of international criminal law which transcends municipal boundaries Academic scholarly and judicial precedent for this book is the adduced in support of this argument The book also examines the role of International Civil Aviation Organization ICAO as the regulatory body responsible for civil aviation in the context of new approaches made by the international community towards the status of ICAO in aviation security The practical value of this work essentially lies in the legal recommendations it makes at its conclusion which are based on existing principles of international law It will thus be invaluable not only to international and aviation lawyers criminal lawyers both international and national security professionals and teachers and students of international law but also to aviation industry executives and regulatory agency specialists whose responsibilities impinge on

or are determined by existing and evolving legal and security measures *Handbook NOTAM, SNOWTAM, GRF, RCC* Afshin Montazeri, Elham Montazeri, 2025-09-30 The book deals with the publication and creation of NOTAMs and SNOWTAMs as well as the Global Reporting Format GRF from a flight operations perspective It is primarily aimed at airport employees working in the field of flight operations e g flight dispatchers and flight crews whose task it is to use this information to ensure safe flight operations The work contains a comprehensive presentation of all relevant information for airport staff to write and publish NOTAMs in accordance with the requirements of the European Aviation Safety Agency EASA and the International Civil Aviation Organization ICAO It also provides relevant added value for all other participants in the aviation industry who need to read and understand NOTAMs This includes in particular students in the field of air traffic management
