GCE Ordinary Level

MARK SCHEME for the May/June 2014 series

5090 BIOLOGY

5090/61

Paper 6 (Alternative to Practical), maximum raw mark 40

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the May/June 2014 series for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level components and some Ordinary Level components.

(eds.), 2021-06-28 Bycatch a term widely used to refer to part of the catch unintentionally caught during a fishing operation in addition to target species and consisting of the discards and incidental catch of vulnerable species is considered one of the most important threats to the profitability and sustainability of fisheries as well as to the conservation of the marine environment and ecosystems Understanding the bycatch issue and adopting effective measures in order to reduce bycatch rates are essential steps towards minimizing the impacts on vulnerable species and ensuring both a sustainable fisheries sector and healthy seas In the Mediterranean and the Black Sea the incidental catch of vulnerable species namely seabirds sea turtles elasmobranchs marine mammals and macrobenthic invertebrates represents one of several challenges for the industrial semi industrial and small scale fisheries that coexist in the region as well as for the diverse and sensitive ecosystems impacted Typically data on this issue have been collected in an opportunistic manner and in ways that make comparisons difficult The annual absolute values of incidental catch of vulnerable species are not available studies cover only a small portion of the total fishing activity and often present important knowledge gaps for many types of fishing gear countries and or subregions as well as on temporal scales for example to establish reliable baselines The result is that little is

known of the scope of the problem despite incidental catch being a significant pressure on the populations of vulnerable species as well as a concern for fishers This regional review is an attempt to compile in one single document all available data and historical records on the incidental catch of vulnerable species in the Mediterranean and Black Sea fisheries obtained from existing literature databases and other grey sources and collated in a standardized and comparable way The main objective is to provide comprehensive baseline information earmark the main data gaps as well as identify the most impacting types of fishing gear by taxonomic group This work is a reminder of the importance of standardized data collection and the need to have baseline information in order to support decision making in the identification of appropriate bycatch mitigation techniques thus enabling analysis of their effectiveness and comparison over time and space as well as facilitating the implementation of relevant conservation and or management measures at the national subregional and regional levels

Technological Innovation in Legacy Sectors William B. Bonvillian, Charles Weiss, 2015-08-18 The American economy faces two deep problems expanding innovation and raising the rate of quality job creation Both have roots in a neglected problem the resistance of Legacy economic sectors to innovation While the U S has focused its policies on breakthrough innovations to create new economic frontiers like information technology and biotechnology most of its economy is locked into Legacy sectors defended by technological economic political social paradigms that block competition from disruptive innovations that could challenge their models Americans like to build technology covered wagons and take them out west to open new innovation frontiers we don't head our wagons back east to bring innovation to our Legacy sectors By failing to do so the economy misses a major opportunity for innovation which is the bedrock of U S competitiveness and its standard of living Technological Innovation in Legacy Sectors uses a new unifying conceptual framework to identify the shared features underlying structural obstacles to innovation in major Legacy sectors energy air and auto transport the electric power grid buildings manufacturing agriculture health care delivery and higher education and develops approaches to understand and transform them It finds both strengths and obstacles to innovation in the national innovation environments a new concept that combines the innovation system and the broader innovation context for a group of Asian and European economies Manufacturing is a major Legacy sector that presents a particular challenge because it is a critical stage in the innovation process By increasingly offshoring production the U S is losing important parts of its innovation capacity Innovate here produce here where the U S took all the gains of its strong innovation system at every stage is being replaced by innovate here produce there which threatens to lead to produce there innovate there To bring innovation to Legacy sectors authors William Bonvillian and Charles Weiss recommend that policymakers focus on all stages of innovation from research through implementation They should fill institutional gaps in the

innovation system and take measures to address structural obstacles to needed disruptive innovations In the specific case of advanced manufacturing the production ecosystem can be recreated to reverse jobless innovation and add manufacturing led innovation to the U S s still strong research oriented innovation system *The Politics of Fear in South Sudan* Daniel Akech Thiong,2021-04-22 When asked in 2016 if he would step down as President of South Sudan Salva Kiir replied my exit could spark genocide Kiir s words exemplify how fear and the threat of mass violence have become central to the politics of South Sudan As South Sudanese analyst Daniel Akech Thiong shows it is this politics that lies at the heart of the country s seemingly intractable civil war In this book Akech Thiong explores the origins of South Sudan s politics of fear Weaving together social economic and cultural factors into a comprehensive framework he reveal how the country s elites have exploited ethnic divisions as a means of mobilising support and securing their grip on power in the process triggering violent conflict He also considers the ways in which this politics of fear takes root among the wider populace exploring the role of corruption social media and state coercion in spreading hatred and fostering mass violence As regimes across Africa and around the world become increasingly reliant on their own politics of fear Akech Thiong s book offers novel insight into a growing phenomenon with implications far beyond South Sudan *Towards a Unifying Pan-Arctic Perspective of the Contemporary and Future Arctic Ocean* Paul F. J. Wassmann,Dorte Krause-Jensen,Markus A. Janout,Bodil Annikki Bluhm,2021-08-25 The Topic Editors Paul F J Wassmann dorte Krause Jensen Markus A Janout and Bodil Annikki Bluhm declare that they are collaborating with pan arctic community
